 HOLIDAYS: February 22, April 19, May 30, June 17, and the remainder of the week from Wednesday noon next preceding Thanksgiving.

Mayor's Address

QUINCY, MASS.

January 2, 1911

WILLIAM T. SHEA

Mayor's Inaugural Address

Gentlemen of the City Council :—

We have assembled at this hour to have administered to us our oath of office and to enter upon the performance of our duties as the executive and legislative branches, respectively, of the City Government of Quincy for the year 1911.

I feel I should at this time express to my fellow citizens my appreciation of the honor they have conferred on me in electing me for a fourth term to the office of Mayor, and assure them that I shall endeavor to the best of my ability to prove worthy of their confidence.

It is customary for the Mayor at this time, briefly, to direct the attention of the Council to the condition of the administrative departments, with such recommendations concerning the same as he may deem necessary; and also to submit for its consideration a detailed statement of the financial condition of the city.

In accordance therewith I submit the following :—

STATEMENT OF DEBT.

Municipal debt, Dec. 31, 1909	\$541,205 00
Bonds matured the year	107,375 00
					<hr/>
					\$433,830 00
Bonds issued and authorized	137,740 00
					<hr/>
Debt Dec. 31, 1910	\$571,570 00

STREET IMPROVEMENT LOAN.

Debt Dec. 31, 1909	\$50,300 00
Bonds matured the year	3,300 00
					<hr/>
Debt Dec, 31, 1910	\$47,000 00

WATER DEBT.

Debt Dec. 31, 1909	\$661,000 00
Bonds matured the year	45,500 00
					<hr/>
					\$615,500 00
Bonds issued during year	50,000 00
					<hr/>
Debt Dec. 31, 1910					\$665,500 00

SEWER DEBT.

Debt Dec. 31, 1909	\$577,500 00
Bonds matured the year	22,000 00
					<hr/>
					\$555,500 00
Bonds issued in year	50,000 00
					<hr/>
Debt Dec. 31, 1910	\$605,500 00

PARK DEBT.

Park debt Dec. 31, 1909	\$28,000 00
Paid during the year	2,000 00
						<hr/>
Debt Dec. 31, 1910	\$26,000 00

RESUME.

Total debt Dec. 31, 1909	\$1,858,005 00
Paid during the year,	180,175 00
					<hr/>
					\$1,677,830 00
Added during the year	237,740 00
					<hr/>
Total debt Dec. 31, 1910	\$1,915,570 00

MATURING DEBT.

	1911	1910
Municipal,	\$120,970 00	\$107,375 00
Street Improvements,	3,300 00	3,300 00
Water,	48,500 00	45,500 00
Sewer,	25,000 00	22,000 00
Parks,	2,000 00	2,000 00
	<hr/>	<hr/>
	\$199,770 00	\$180,175 00

MUNICIPAL DEBT.

The Municipal debt Dec. 31, 1910, is divided as follows :

Schools,	\$282,038 75
Streets and bridges,	239,945 25
Public buildings,	6,259 00
Fire apparatus,	18,062 00
Other debts,	25,265 00
						<hr/>
Total,	\$571,570 00

HOW DEBT MATURES.

The Municipal debt falling due in two years is compared below :

	1911	1910
January	\$10,500 00	\$11,750 00
February	4,000 00	4,000 00
March	1,000 00	5,000 00
April	4,500 00	5,625 00
May	10,200 00	6,000 00
June	2,500 00	3,500 00
July	32,225 00	22,980 00
August	8,670 00	8,420 00
September	11,400 00	9,500 00
October	12,000 00	10,600 00
November	1,550 00	1,000 00
December	22,425 00	19,000 00
Total	\$120,970 00	\$107,375 00

HOW APPORTIONED.

The Municipal debt coming due in 1911 is divided as follows :

Schools	\$50,751 75
Streets	45,776 25
Fire apparatus	2,617 00
Public buildings	7,563 00
Miscellaneous	14,262 00
Total	\$120,970 00

CITY VALUATION.

The valuation of the three preceding years is as follows :

1908 Net Valuation,	\$28,014,034
1909 Net Valuation,	31,118,635
1910 Net Valuation,	32,319,555

A COMPARISON.

Summary of total debt Dec. 31, 1910, as compared with total debt Dec. 31, 1909:

	1911	1910
Municipal,	\$571,570 00	\$541,205 00
Street Improvements,	47,000 00	50,300 00
Water,	665,500 00	661,000 00
Sewer,	605,500 00	577,500 00
Parks,	26,000 00	28,000 00
	<hr/>	<hr/>
	\$1,915,570 00	\$1,858,005 00
Increase in Total debt for the year,	57,565 00
Increase in Municipal debt for the year,	30,365 00

LOANS ISSUED IN 1910.

Municipal, Sundry Appropriations . . .	\$137,740 00
Water, (construction \$40,000, meters \$10,000) .	50,000 00
Sewer construction,	50,000 00
	<hr/>
Total,	\$237,740 00

APPROPRIATIONS 1910.

For which loans were authorized:

Police auto	\$3,500 00
Houghs Neck school	2,000 00
Fire alarm wires	2,500 00
Police signal wires	1,000 00
Montclair school lot	7,700 00
Protection of records	3,000 00
John Hancock school heating	6,000 00
Scavenger Equipment	3,000 00
Steam roller	3,000 00
Purchase insurance building	4,500 00
Hancock street paving	20,000 00

Granolithic sidewalk	1,100 00
Concrete sidewalks	17,600 00
Fire alarm boxes	1,725 00
Awards and claims	2,500 00
Wollaston school lot	9,400 00
Playground equipment ,	500 00
Crosswalks	800 00
Whitwell street sidewalk	1,400 00
Surface drainage	12,140 00
Assessors' plans, Ward Four	1,000 00
Oak street	400 00
Police station plumbing	400 00
South Walnut street	2,800 00
Larry place	500 00
Bedford street	2,250 00
Germain avenue	3,350 00
Plymouth street	1,600 00
Ritchie road	2,175 00
Ballou street	725 00
Hill street	750 00

East Howard street sidewalk	330 00
Goffe street sidewalk	120 00
Phipps street	900 00
Cleaning brooks	100 00
Assessors extra clerical	100 00
Auto Fire department	5,500 00
Willard street wall	600 00
Claremont avenue	1,800 00
Oakland street	825 00

\$137,740 00

Loans were also authorized (bonds to be dated 1911) as follows:

Wollaston school	\$75,000 00
Montclair school	45,000 00
Various streets	14,000 00
Total	\$134,000 00

LOANS UNDER SPECIAL ACTS.

Water department	\$50,000 00
Sewer department	50,000 00
Total	\$100,000 00

LIMIT OF INDEBTEDNESS.

Our limit for general Municipal indebtedness is two and one-half per cent. on the average net valuation of the city for the last three years.

Average net valuation for said years,	.	.	.	\$304,840 75
Limit of borrowing capacity for city in 1911,	.	.	.	762,101 00
Municipal debt Dec. 31, 1910,	.	.	.	571,570 00
Net borrowing capacity Dec. 31, 1910	.	.	.	190,531 75

LIMIT OF TAX LEVY.

The law allows us to assess \$12 per \$1,000 on the net valuation for the preceding year for the current expenses of the city for the present year.

Net valuation of the city in 1910	.	.	.	\$32,319,555
\$12 on \$1,000 (amount available for current expenses,	.	.	.	\$387,834

The total city Municipal debt outside of the debts authorized by special Acts amounts to \$571,570 and of that amount \$120,970 falls due this year.

STREETS.

To keep the streets of the city in good condition is a difficult problem, and one requiring constant attention. Good results have been obtained by the Street department during the past year. The work of laying surface drains has been continued, and has proved very beneficial to the streets.

I believe this work should be continued this year and recommend that an appropriation be made for that purpose.

In my message of last year I made several suggestions in regard to streets. My views on these matters are the same this year, and in addition I would recommend that Hancock street between Saville and Dimmock streets be straightened and widened in accordance with a plan I sent to last year's Council.

SEWERS.

The rapid growth of the city makes necessary the expenditure of large sums of money for sewer construction. Last year four and three-fourths miles of sewer were built and 340 house connections made, and there still remain applications which if granted would call for the expenditure of at least \$30,000. The matter of sewer construction is very properly carried on under the bonding method and outside the debt limit.

For this work the Legislature of 1895 authorized the issuing of bonds to the amount of \$400,000, of which \$398,000 has been spent; the Legislature of 1902 authorized the issuing of bonds to the amount of \$200,000, of which \$196,000 has been spent, and the Legislature of 1905 authorized the issuing of bonds to the amount of \$200,000, all of which has been expended.

These issues are practically exhausted and I recommend that application be made to this year's Legislature for authority to issue additional bonds to carry on the work of further sewer construction.

SIDEWALKS.

During the past year three and five-eighths miles of permanent sidewalks were built. I believe this work is appreciated by our citizens and a substantial appropriation should be made to continue the same during the present year.

SCHOOLS.

All the school buildings, except the Adams, are in good condition. The Adams building is old, out of date, and should be replaced by a new one. The School Committee have recommended that a new building be erected in the Bigelow Park district. This recommendation should receive your early and serious consideration.

Last year \$21,000 was appropriated for the erection of a four-room school building at Houghs Neck. The building has been erected and the city, considering the amount of money expended, has, in my opinion, a very good and satisfactory building. This opinion is concurred in by men competent to judge of such matters, who, at my request, from time to time during the construction of the building, inspected the same.

Appropriations have been made for the erection of new school buildings in the Wollaston and Montclair districts. Work on these buildings will be commenced early in the year.

PUBLIC PLAYGROUNDS AND PARKS.

Next to schools I believe properly equipped and maintained playgrounds to be of the most vital importance in the development of the children of the city.

The city in 1909, having accepted the provisions of chapter 513 of the Acts of 1908, it is incumbent upon it to equip and maintain at least two playgrounds under the provisions of that act. Last year a start was made along these lines in Ward Four. This year the work should be continued and in addition to the one in Ward Four, another playground should be equipped and maintained, possibly in Ward Two.

The public bathhouse in Ward Two should be enlarged, as it is wholly inadequate to meet the demands made upon it. An appropriation should be made for the purpose.

BOARD OF HEALTH.

This department is fast becoming one of the most important in the city.

Prior to last year the city let the scavenger work by contract. This manner of doing the work having proved unsatisfactory it was abandoned. The work is now being done by the city.

Some delay was necessarily experienced by the department in securing its equipment and in arranging details incidental to its assuming this work. It is now, however, being carried on by the department in a satisfactory manner, and I believe that the results this year will justify the change from the former method of doing the same.

In the spring of last year a tuberculosis camp was established in Quincy. Arrangements were made with the parties interested in the same whereby several of the city's patients were cared for in the camp at an expense less than it has heretofore cost the city to care for them elsewhere.

Although the hospital can only accommodate nine permanent patients it has proved of great assistance to the Board of Health, as well as a public safeguard against the spread of tuberculosis, and its work should be appreciated by our citizens.

I hope the city will some day in the near future see the wisdom of maintaining a hospital for contagious diseases, one which will accommodate more patients than the present camp is capable of accommodating.

WATER DEPARTMENT.

Large demands are made on this department each year owing to the number of buildings being erected in the city. Notwithstanding the department has met these demands as promptly as the means at its disposal would allow, a large number of applications for water are on file in the water office, and I trust an appropriation will be made early in the year to carry on the work of this department.

FIRE DEPARTMENT.

While this department is in good condition its efficiency will be greatly improved by the addition of the auto fire truck, the purchase of which was recently authorized by the Council of 1910.

This department could be further improved by the addition of more permanent men.

POLICE.

This department has done good work during the past year.

The new combination ambulance and patrol automobile has added greatly to the efficiency of the department. The work of this department, however, is made hard owing to the small number of men at its command.

I believe the number of regular patrolman should be increased and recommend that action to that effect be taken.

POOR DEPARTMENT.

Unfortunately the demands on this department are constantly increasing; the Overseer, however, has relieved the wants of needy applicants as far as the funds at his disposal would allow.

WIRES AND SHADE TREES.

In my inaugurals for the past three years I have called the attention of the Council to the necessity of establishing a department to have charge of and exercise supervision over the public wires and shade trees of the city. Each year I am more strongly convinced of the necessity of such a department, and trust that it will be established during the present year.

WATER FRONT.

Quincy's position in Boston harbor is unexcelled by any city as to its opportunities for future developments, and I have endeavored to keep in touch with all matters pertaining to a healthy business growth on our water front. With the immense tract of land owned by the Railroad Company at Atlantic needing only the completion of a track connecting Mattapan, Hyde Park, Dedham and Framingham to give our water front freight connection with the centre of our state, with the United States Government survey of the last link of the Intra-Coastal Canal from Narragansett bay to Boston harbor practically finished, with our improved channel, our great ship-building plant at Fore river, our world famous granite, we have right here in our city the greatest incentive to still further improve our water front of any city in New England. We have commenced to buy locations for public landings and expect in the near future to have all sections of the city provided for. I am investigating the matter of a public dock and firmly believe that our granite industry demands the building of such a dock with improved facilities for loading and unloading, and that such an improvement would be of great benefit to our granite business.

I recommend the appropriation of at least three hundred dollars (\$300.00) for the use of the Water Front Commissioner to be spent with the approval and consent of the Mayor, in studying and advancing the water front of Quincy and the city's interests in any waterway matter.

CITY HALL.

Last year I called the attention of the Council to the necessity of providing more room at City Hall. My views on the subject are the same and I believe the necessity to be still greater.

Again I recommend that the Council take action in the matter.

NO LICENSE.

Our citizens have again by a large majority expressed themselves in favor of No License. The law has been enforced during the past year, and it will continue to be during the present year.

BACK TAXES.

I am giving careful consideration to the matter of back taxes, one which has been the subject of much discussion in recent years. These taxes have been accumulated during many years, and I believe it unwise to continue carrying so much of them as are clearly uncollectable as a city asset, and believe that they should be abated.

Gentlemen: We have been elected the representatives of the citizens of Quincy and entrusted by them with the duty of administering their affairs.

In discharging those duties we should be guided solely by our oath of office and no ulterior consideration of any kind should influence our actions.

However much we may differ as to method and questions of immediate policy, we should unite in one common cause,—the permanent welfare of our city.

We are here to legislate for the benefit of the whole city and all its citizens, and not for sectional or political advantage.

Treasurer's Report.

Auditor's Report

Quincy, Mass., Feb. 1, 1911.

To the City Council, Quincy, Mass.

In accordance with the City Charter, the auditor of accounts submits the annual report of his department, showing in detail the expenditures of each department.

Also several statements showing the financial condition of the City at the close of the Financial year Dec. 31, 1909.

The Treasurer's and Tax Collector's books have been examined and I have found the required vouchers in their respective offices.

HENRY O. FAIRBANKS,

City Auditor.

BORROWING CAPACITY FOR 1911.

(Revised Laws, Chapter 27, Section 3.)

An Act to Limit Municipal Debt of and the Rate of Taxation in Cities.

Be it enacted, etc., as follows:

SECTION 3. A city shall not become indebted in amount exceeding two and one-half per cent. on the average of the assessors' valuations of the taxable property therein for the three preceding years, the valuation of each year being first reduced by the amount of all abatements allowed thereon previous to the last day of December in the year preceding said assessment.

The net valuation of the city of Quincy for the past three years is as follows:

1908 Net Valuation	\$28,014,034
1909 Net Valuation	31,118,635
1910 Net Valuation	32,319,555
Average Net Valuation for 3 years	30,484,075
Two and one-half per cent. of the above	762,101
Municipal debt Dec. 31, 1910	571,570
	<hr/>
Borrowing power 1911	\$190,531

To which can be added the amount of the bonds as they mature each month.

TAX LEVY FOR 1911.

(Revised Laws, Chapter 12, Section 54.)

An Act authorizing Assessors in Cities of less than One Hundred Thousand Inhabitants to use the Valuation of the Year Preceding as a Basis of Taxation.

Be it enacted, etc., as follows:

SECTION 54. The taxes assessed on property exclusive of the state tax, county tax and sums required by law to be raised on account of the city debt shall not in any year exceed twelve dollars in any city on every one thousand dollars of the assessors' valuation of taxable property therein for the preceding year, said valuation being first reduced by the amount of all abatements allowed thereon previous to the thirty-first day of December in the year preceding said assessment, subject to the following provisions: If the city council of a city which contains less than one hundred thousand inhabitants according to the last preceding national or state census so determines, the average of the assessors' valuation of the taxable property therein for the preceding three years, said valuation for each year being first reduced by the amount of all abatements allowed thereon previous to the thirty-first day of December in the year preceding said assessments, shall be used to determine said limit of taxation instead of said assessors' valuation of the preceding year. In the city of Boston, and in all cities which contain one hundred thousand inhabitants or more according to the census aforesaid, said average shall be so used. In the city of Boston, said taxes shall not exceed ten and one-half dollars instead of twelve dollars as aforesaid. Any order or appropriation requiring a larger assessment than is herein limited shall be void. The provisions of this section shall not affect any existing exemption from the operation of the corresponding provisions of earlier laws.

Net Valuation for 1910	\$32,319,555
Assessed at \$12 per Thousand gives	387,834

Which is the legal limit for taxation for municipal purposes for 1911, outside of notes, interest, state and county taxes.

Assessor's Report.

To His Honor, the Mayor of the City of Quincy:

We herewith submit our annual report for the year 1910.

Warrants received and amounts raised for current expenses by the assessment of taxes in the City of Quincy, for the financial year commencing January 1, 1910, were as follows:

A state warrant for the proportion of
the City of Quincy\$ 43,450.00

A County warrant for the proportion
of the City of Quincy of a County
tax of \$210,000 \$21,927.04

By the provisions of Chapter 488 of the
Acts of the year 1895, entitled "An
Act to provide for a Metropolitan
Water supply;" Chapter 453 of
the Acts of the year 1901, entitled
"An Act to provide for additional
Metropolitan Water Loan," we
have been assessed for the year
1910 \$50,950.31

Of this amount \$11,582.27 is to meet
the requirements of the sinking
fund established under said chap-
ter; \$30,936.70 is to pay interest

and \$8,431.34 is on account of the cost of maintenance and operation for the year 1910.

By the provisions of Chapter 406 of the Acts of the year 1895, entitled "An Act to provide for a system of sewerage disposal for the Neponset River Valley," and Chapter 424 of the Acts of the year 1899, entitled "An Act to provide for the construction of a high level gravity sewer for the relief of the Charles and Neponset River Valleys," we have been assessed.. \$28,372.01

Of this amount, \$3,569.26 is to meet the requirements of the sinking fund established under said chapter, \$16,067.88 is to pay interest, and \$8,734.87 is on account of the cost of maintenance and operation for the year 1910.

In accordance with the provisions of Chapter 407 of the Acts of the year 1893, entitled "An Act to establish a Metropolitan Park Commission," Chapter 550 of the Acts of the year 1896, entitled "An Act relative to the Metropolitan Parks and boulevards," and Chapter 464 of the Acts of the year 1899, entitled "An Act to authorize the Metropolitan Park Commission to take, control and manage Nantasket Beach and adjacent lands and waters," we have been assessed \$15,379.35

Of this amount, \$1,986.93 is to meet the requirements of the sinking fund established under said chapter, \$5,629.37 is to pay interest, and \$7,763.05 is on account of the cost of maintenance and operation for the year 1910.

In pursuance of the provisions of Section 16, Chapter 47 of the Revised Laws (State Highway Tax), we have been assessed \$114.50

Amount raised for municipal current expenses, based on the valuation of December 31, 1909, at \$12 per \$1,000	\$374,162.18
City sewer, less receipts	28,851.43
City debt	107,375.00
Interest city debt	21,450.00
Street improvement debt	3,300.00
Interest street improvement debt	1,746.50
Park debt	2,000.00
Interest park debt	1,120.00
Interest temporary loans	18,000.00

Aggregate of amount \$558,005.11

9,581 polls, at \$2.00 each, were recorded for assessment and included in the estimate that determined the rate of taxation for the current year .. \$19,162.00

By the operation of the law providing for the supplementary assessment of omitted male persons liable to assessment under the provisions of Section 19, Chapter 560, Acts of 1907, there were added 148 polls,

making the number assessed 9,729, excluding 85, which are exempt under the provisions of Chapter 367, Acts 1907.

The amount of estimated receipts lawfully applicable to the payment of expenditures of the year, as provided in Chapter 12, Section 37, R. L., were deducted \$54,928.00
 To which was added for overlay, as provided in Chapter 12, Section 55, R. L. \$7,536.64

SUMMARY OF AMOUNT COMMITTED TO THE BOARD OF ASSESSORS

Appropriation order	\$374,162.18
Debts and interest	154,991.50
Water debt, maintenance and interest	82,100.00
Sewer debt, maintenance and interest	46,580.00
Metropolitan water assessment	50,950.31
State tax	43,450.00
County tax	21,927.04
South Metropolitan sewer assessment	28,372.01
Metropolitan park assessment	15,379.35
State highway tax	114.50
Total	<hr/> \$818,026.89

VALUATION

The valuation of the city April 1, 1910 as determined by the assessors, and upon which the rate of taxation was levied, is as follows:

Value of land	\$10,991,650.00
Value of buildings	14,117,100.00
	<hr/>
Total	\$25,108,750.00
Exemptions as provided in clauses 9 and 10, Section 5, Chapter 12, R. L., also Chapter 367 Acts 1907..	119,225.00
Total valuation of real estate sub- ject to taxation	\$24,989,525.00
Valuation of personal property other than bank stock separately as- sessed	\$7,218,325.00
Value of shares of National Banks lo- cated in and taxable in the City of Quincy	248,530.00
	<hr/>
	7,466,855.00
	<hr/>
Total valuation	\$32,456,380.00
Tax rate	\$20.00
Taxes levied on property polls, person- al and real estate	\$647,833.00
The valuation was also increased by assessments under provisions of Section 85, Chapter 12, R. L...	35,125.00
The total valuation of the city upon which taxes were assessed for the year 1910 when all assessments were made, was	32,491,505.00
A net gain over 1909 valuation of....	953,115.00

VALUATION BY WARDS

(Not including valuation of bank stock)

	Personal	Real Estate	Total
Ward 1	\$3,843,575.00	\$7,490,012.50	\$11,333,587.50

Sidewalk assessments, apportioned	81.53
Interest on same	19.51

Street Watering

Street watering assessments committed by the commissioner of public works, in accordance with City Council order No. 109, passed May 2, 1910	\$4,193.28
---	------------

Suppression of Gypsy and Brown-Tail Moths

In accordance with Chapter 381, Acts 1905, as amended by Chapter 268, Acts 1906, and Chap- ter 521, Acts 1907, the commitment of the com- missioner of public works amounted to	\$1,043.62
--	------------

Summary from Table of Aggregates

Resident property owners	5394
Non-resident property owners	2540
Poll tax, only	7748
Number of horses assessed	1073
Number of cows and neat cattle	722
Number of swine	66
Number of dwelling houses	6353
Number of acres of land	6689

Valuation of Property Exempt from Taxation.

Literary	\$262,017.35
Benevolent	642,320.26
Religious	374,275.00
City of Quincy, real estate, and fire apparatus ..	1,415,125.00

The Assistant Assessors who served during the year were:

James P. Dunn and John McDonnell	Ward 1
Henry Mullane	Ward 2
Leo J. McMaster	Ward 3
Edward T. Monahan	Ward 4
John T. Cain	Ward 5
Eben Stocker	Ward 6

The polls returned by the assistant assessors and those registered for the year, amounted to 9,814, made up, as follows:

	Precinct 1	Precinct 2	Total
Ward 1,	811	1085	1896
Ward 2,	873	863	1736
Ward 3,	890	905	1795
Ward 4,	724	908	1632
Ward 5,	794	698	1492
Ward 6,	710	553	1263

The personal property consisting of horses, carriages and cows, assessed by the assistant assessors, is as follows:

Ward 1,	\$87,750.00
Ward 2,	34,650.00
Ward 3,	38,300.00
Ward 4,	49,200.00
Ward 5,	54,600.00
Ward 6,	26,250.00
	<hr/> \$290,750.00

The number of dogs returned by the assistant assessors, is as follows:

Wards	1	2	3	4	5	6	Total
Male,	175	140	113	158	194	182	962
Female,	36	25	13	20	23	31	148
Kennel,		2					2

During the year the Commissioner of Public Works has notified the assessors of 252 apportioned main sewers, and 346 particular sewer assessments. The total number of individual accounts kept in this office is as follows:

Main sewer assessments	1,600
Particular sewer assessments	473
Street sprinkling	2,275
Sidewalk assessments	17
Gypsy and brown-tail moths	713

During the past year Quincy has come into prominence as the scene of the Harvard Aviation Meet held at Atlantic; thousands of people were attracted to the city and could not have failed to recognize our proximity to Boston and the rapid transportation facilities therefrom to Quincy. Situated in the Metropolitan District, within five miles of the State House, Quincy is in direct line for immediate development, both as a place of residence and as a commercial centre.

In our report of last year we commented on the increased

land development and building activity; the table of comparisons submitted herewith shows an increased taxable valuation in this regard of over \$800,000 for the year 1910.

The valuation of taxable personal property has increased over \$1,650,000 during the past year, the total valuation being \$7,466,855 as against \$5,813,040 in 1909.

The fact that the Senate of the United States favors the appropriation of \$140,000 for the purpose of dredging the Weymouth Fore River emphasizes the fact that the water front of Quincy presents a splendid opportunity for the establishment of manufactures. Quincy has over twenty-two miles of water front, about twelve of which are adapted to the purpose of commerce and navigation, which, if developed, would bring Quincy in direct trade relations with Boston, New York, and other trade markets of the country.

Respectfully submitted,

WARREN W. ADAMS,
JOHN A. DUGGAN,
ALEXANDER FALCONER,

Assessors of the City of Quincy.

Police Department

To His Honor the Mayor of the City of Quincy:

I herewith submit the annual report of the Police Department for the year ending December 31, 1910.

ROSTER OF POLICE FORCE

Liquor raids	0	Total	12

ENFORCEMENT OF THE LIQUOR LAW

The enforcement of the liquor law has for the second year been under the charge of Acting Inspector Alfred W. Goodhue and has been carried on with unabated vigor and ceaseless activity. I again recommend that this position be made a permanent one with an increase in salary that should go with it.

The operation of the rule requiring holders of express permits for the transportation of intoxicating liquors in Quincy to forward a daily transcript of their liquor receipts to the Police Station has been fairly lived up to, most of the expressmen send in a daily report and the others, some of whom do not transport liquor every day, send in their reports so that the inspector can keep a very good account of the amount of liquor that is being brought into the city by holders of these permits. As stated in the report of 1909 there is nothing that keeps the department in closer touch with the liquor traffic than these daily reports and I sincerely hope that this method will continue. During the year, three violators of the law regarding illegal transportation of liquor have been convicted and their permits revoked by the City Council. Two others have cases now pending before the Supreme Court for a decision which is being looked forward to as having an important bearing on future cases. Following is the record of violations of the different phases of the liquor law that have been brought before the court for the year 1910:

Total number of cases before the court	45	
Violation of the liquor law	41	
Keeping disorderly house	1	
Occupants of the same	4	
Fined in the District Court	33	\$1810
Fines paid in the District Court	23	\$1110
Appealed from District Court sentence	8	
Dismissed and discharged in lower court	11	
Committed for Non-payment of fines	3	
Fines paid in Superior Court	3	\$250
Continued in Superior Court	3	
Continued to Supreme Court	1	
Liquors forfeited in District Court	20	

CONCLUSION

The year 1910 was an eventful one for the Police Department. On July 28 the department was called on to cope with one of the most atrocious series of crimes that ever happened within the Commonwealth. At about 2 P. M., a well-known granite manufacturer of Quincy, crazed by his monetary losses and his inability to procure the necessary capital to conduct his business, after what seemed mature deliberation procured a horse and buggy at Wollaston, drove to the house of his mother on Trafford street and after a short conversation shot her in the forehead killing her instantly. From there he proceeded to the granite sheds of his elder brother and without warning began to shoot at him with a revolver held in each hand. Four shots took effect in his body, but luckily none of the wounds resulted fatally. The bookkeeper of the firm was shot at but was not hit. Running from there back to his buggy he reloaded his guns and drove with all speed to the firm of another granite manufacturer on Brooks avenue and calling the head man started a conversation with him and almost immediately pulled a revolver from his belt and after a struggle shot four times at him wounding him

severely but not fatally. From there he again got in the buggy and after reloading drove at a furious pace toward Centre street, from there through Granite to Smith and reached the rear of his own granite yard on Quarry street. Leaving his team he walked across Quarry street and entering the office of one of the most prominent granite manufacturers in the city asked for the use of the telephone. Receiving an answer in the affirmative he entered the inner office and drawing both revolvers he opened fire and emptied them into the body of the senior member of the firm and one shot took effect in the knee of another member of the firm making a painful but not fatal wound. Leaving the dying man on the floor he rushed out, and ran up Quarry street toward Carroll's lane and from there, after going a short way into the woods was seen by some little girls to enter a by-path to the left and was never seen alive again. From the time the first crime was committed for which no alarm was given until the entire tragedy was over less than half an hour had elapsed, and in all probability from what subsequently developed he had committed suicide within five minutes from the time he left his last victim, and had covered nearly a mile of territory. A general call for help had been sent out and was responded to by police officers, firemen and citizens from our own city and the Police Departments of Milton, Weymouth, Braintree and the Metropolitan Police of the Blue Hills Reservation. A thorough search was made of the surrounding country for days and weeks after. Quarry holes were dynamited and searched. The State Police were called into the case and rendered invaluable assistance going on two occasions into Canada following clues that looked promising. The Police Department covered practically every part of the country with circulars offering a reward for the capture of the murderer, particularly where granite was quarried or manufactured. Men answering the description were seen in every part of the country and letters innumerable were sent giving a description by which men placed under arrest on suspicion

could be positively identified, there being certain marks that could not be mistaken, but all to no avail. In the meantime one of the officers had stuck to the theory that with all avenues of escape closed to him it was practically an impossibility for him to have got by without being seen by someone. Acting on this theory he had spent almost his entire vacation and every day off that he could get with the one idea of dragging the different quarry holes to satisfy his suspicions. He was strengthened in his belief and co-operated with by a Braintree officer who carried on a granite business on his route. On every occasion when they got together they talked the matter over and finally came to the conclusion that the only thorough way to search was to procure a boat and the proper grapnels and take the boat to the ponds with them. Finally October 14th at noon, they proceeded to the old Merrymount quarry, which was the nearest one to the final place of disappearance. Launching their craft they proceeded to drag with the grapnels. They worked for some time without success, but finally caught hold of something that seemed so heavy that it seemed impossible that it could be a human being. Hauling up gradually the gruesome sight soon came to the surface after having remained under the surface of the water for seventy-seven days from the date of the tragedy. At the time the two revolvers and a sheath knife were in a belt worn around his waist and tied to a pair of handcuffs securely locked to his wrists were two pneumatic bush-hammers that weighed at least forty pounds. This explained the weight of the body and also the fact why the body did not come to the surface when the pond was dynamited.

A great feeling of relief came over the department at once and also over the community at large. The family of the man who had stuck to the theory that he was insane and the tragedy was the outcome of a disordered mind were also immensely relieved.

The Fourth of July celebration and the Harvard-Boston Aeronautical Meet at Squantum tested the capacity of the de-

partment to the utmost. Both affairs were handled with credit to the department and the city. Probably the largest crowds ever assembled at one time in the history of the city attended the meet on Labor Day, September 5th, at least 100,000 people being congregated within a short distance of the Aviation Field and all the surrounding points of vantage were black with people. For the first time in its history out of town police had to be called in to help handle the enormous crowds that attended. Newton, Somerville, Cambridge, Milton, Hyde Park and Weymouth were called on to help augment the force of the Quincy police, making a combined force of about 140 uniformed men daily on the grounds and the streets adjacent and a large force of mounted men from the Metropolitan Park Reservation at Atlantic shore. At the same time a large force of plain clothes men and State Police kept a sharp lookout for suspicious characters who might be attracted. Accidents reported were few and lost articles and reports of property stolen were at a minimum. I take this opportunity to thank all out of town police, State Police, Metropolitan Police and the regular, reserve and special police of the Quincy department for their energetic work during the entire eleven days of the meet.

The advent of the Combination Auto Patrol and Ambulance has filled a long needed want. With our long runs to isolated parts of the city, we are now enabled to cover the distance in about one third of the time. The time has been so short since the auto has been in commission that a comparison of the cost with the old horse-drawn vehicle is not given, but the increased efficiency of the department will more than make up any increase in cost if there will be any.

Another great improvement has been the connection of the cell-room with the sewer. The interior of the station should be thoroughly renovated during the coming year. As nothing has been done since 1902 it certainly shows the need of a little paint and whitewash.

As was intimated in the inaugural address there should be an increase in the permanent force as the city is growing rapidly and the calls for better police protection is almost continuous in certain sections.

Respectfully submitted,

FRANK E. BURRELL,

Chief of Police.

Public Burial Places

January 1, 1911.

To His Honor the Mayor of the City of Quincy :

The Managers of Public Burial Places respectfully submit the following report for the year ending December 31, 1910:

The appropriation for care and maintenance of the public burial places has been economically expended, principally for the immediate needs of Mt. Wollaston Cemetery. The constant growth of this cemetery makes necessary a larger expenditure for care and equipment, and in view of the fact (as shown by the following statements), that the receipts have kept pace with its growth, we earnestly recommend that an increased appropriation be made for maintenance and some necessary improvements which the lot owners have the right to demand.

The Hancock Cemetery has been cared for as thoroughly and frequently as possible, the income from the Charles E. French Fund being the only money at the disposal of your board for this purpose.

The resources, expenditures, and receipts of this department for the year 1910 are as follows:

	Resources	Expenditures	Balance
Balance on hand Jan. 1, 1910	\$201.07		
Appropriation	4,000.00		
Income from trust funds ...	1,238.30

Report of Overseer of Poor

January 1, 1911.

To His Honor the Mayor of the City of Quincy:

The Overseer of the Poor in compliance with the city ordinances respectfully presents his report for the year ending December 31, 1910.

The calls for aid were many during the year 1910, the average number in our City Home was larger and the calls for temporary aid more than in previous years. As a result the expeditue has been larger, but we must also report larger receipts.

The disbursement of the appropriation for the poor during the past year will have to tell its own story. It has been the aim of the Overseer to have the poor well attended and also to look out for the people who pay the bills, which we think we have done. In comparing the expenses with other towns and cities we find that some are paying seventy-six cents (\$.76) per capita and our city with over thirty thousand population costs but forty cents (\$.40) per capita.

The health of the inmates of the Almshouse has been good during the year and we wish to convey to Mr. and Mrs. William J. Vaughan, Warden and Matron, our appreciation of their uniform kindness and efficiency.

The Churches, Fraternal Societies and Charitable As-

sociations have worked in a way that cannot be estimated in dollars and cents. A friendly hand and a kind word has given hope and encouragement where formerly hopelessness and despair reigned, and this I wish to publicly acknowledge.

We are indebted to our local press, who at all times has realized that to exploit the misfortunes of those who happen to be in such circumstances as to make it imperative for them to apply for public aid is not right. So that they, who in the rounds of duty, often visit this office at the same time, do not expect the Overseer to tell them and through them the public, the latest misfortune and the most recent tragedy that has come to his notice.

The past year the Overseer has had a clerk in his office and it takes her constant attention looking after the many cases in this office. Few in the city realize the amount of detail work entailed in looking up settlements both in our cases and also hospital cases.

I wish to thank Dr. H. C. Hallowell, City Physician; for his kindness and the labor he performs in making the poor of our city comfortable and looking out for their wants. The City of Quincy as well as the unfortunates are fortunate in having such a man to care for them.

A detailed statement of the cost of the Almshouse and Outside Poor will be found in the following tables:

The following is the financial statement for the year:

Appropriation	\$12,000.00	
Transfers	1,034.19

Respectfully submitted,

JAMES H. ELCOCK,

Overseer of the Poor.

Report of City Physician

Quincy, Mass., December 31, 1910.

To His Honor, the Mayor of Quincy:

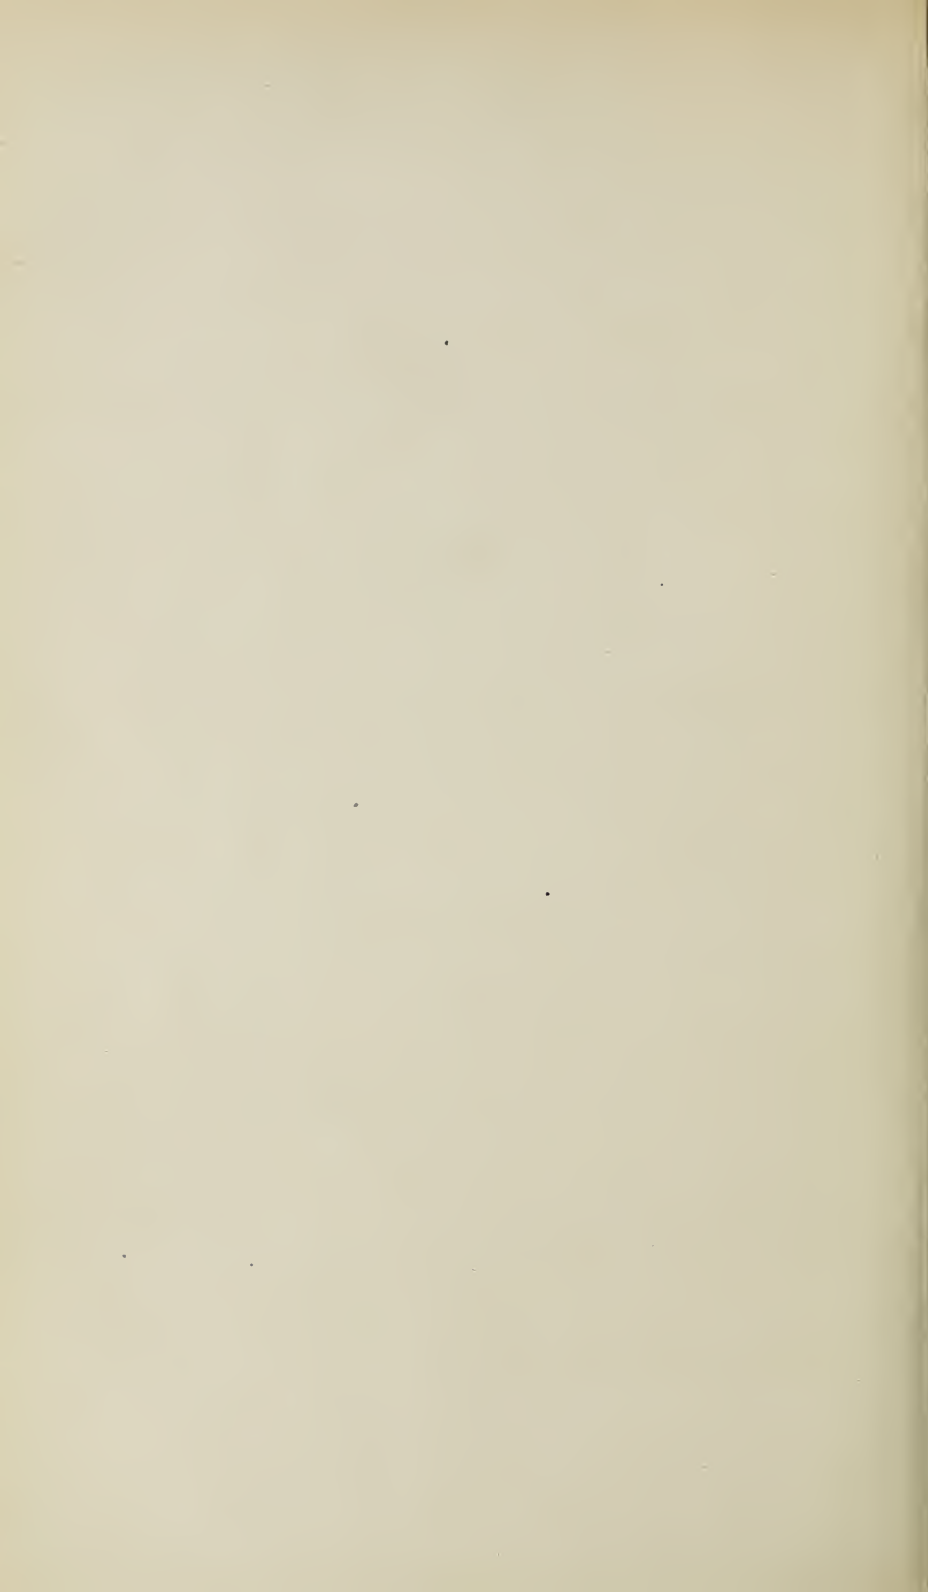

Sir:—I have the honor to submit the following as the report of the City Physician for the year ending December 31, 1910:

Visits to Almshouse	45
Visits to outside poor	152
Cases of child birth	8
Office visits and vaccinations	72
Visits to police station	30
Deaths	4

Very respectfully,

HENRY C. HALLOWELL MD.,

City Physician.

Fire Department

Chief Engineer's Office, Central Fire Station

Quincy, Mass., Dec. 31, 1910.

To His Honor, the Mayor and the City Council:

In compliance with the requirements of the City Ordinance, I hereby present my annual report for the year ending Dec. 31, 1910, containing a statement of all fires and alarms for the year, the loss and insurance on the same as far as could be ascertained, the list of the permanent force of the department and their ages, also a schedule of the property under their charge.

ORGANIZATION

The force consists of one chief, and three assistant engineers, eighteen permanent men and sixty-three call men. Combination No. 1, at Central Fire Station has two permanent and eight call men; Combination Hook and Ladder No. 1 has one permanent and eight call men; Combination Hook and Ladder No. 2 has two permanent and seven call men; Hose No. 2 has one permanent and five call men; Hook and Ladder No. 3 has two permanent and seven call men; Hose No. 3 has one permanent and six call men; Hose No. 4 has two permanent and six call men; Hose No. 5 has one permanent and nine call men; Combination No. 2 has two permanent and seven call men.

OFFICERS

Frank C. Packard,
Daniel J. Nyhan,
James P. Dillion,

First Assistant Chief
Second Assistant Chief
Third Assistant Chief

APPARATUS

The apparatus of the department consists of one steam fire engine (Amoskeag); three combination chemical engines and hose wagons; two combination ladder trucks; one straight hook and ladder truck; five hose wagons; one fire alarm wagon, and three spare wagons; one chemical engine; one hand engine not in service and five pungs.

HOSE

We have in the service 12,000 feet of cotton hose rubber lined (8000 feet in good condition and 2000 feet in fair condition and 2000 feet in poor condition). I believe the department should be kept well supplied with hose in case of emergency. The life of hose is two years, after that it is liable to burst when heavy pressure is put on. I will call the attention of the Council to placing more hydrants on old line of pipes, as it would give better fire protection, also saving the city a great deal of money in using shorter lines of hose.

FIRE ALARM

The fire alarm service has been increased the past year by placing twenty-four boxes on the circuit. There are one hundred and fourteen fire alarm boxes in service. This branch of the service needs the greatest attention so when the boxes are pulled, they will work promptly.

ELECTRICAL APPLIANCE

Two hundred and fifty-four cells of battery, one six circuit repeater, one Gamewell switch, six circuit switches, one ground test switch board, one brake key, one mill, amp. meter, six galvanized meters, one quartered oak switch board, one bolt meter, six Rogers protectors, one amp. meter, six resistance coils, one circuit braker, six double throw switches, twelve lamps on switch board, six test jars, one half horse power motor for charging batteries, one rheostat, three switches, three automatic whistles, five Gamewell tower strikers, one eighteen inch gong; Hose No. 2 has one twelve inch gong; Frank C. Packard has two six inch gongs; Daniel J. Nyhan has one six inch gong; Hose No. 3 has one twelve inch gong; Hose No. 4 has one eighteen inch gong; Atlantic combination has one twelve inch gong; Houghs Neck has one eighteen inch gong; Wollaston Foundry has one six inch gong; Tubular Rivet and Stud Co. has one twelve inch gong; Old Colony Street Railway and Power House has one twelve inch gong;; Captain Hayden has one six inch gong; Charles Martin has one six inch gong; two extra gongs at Central Fire Station; Quincy Electric Light and Power Co. has one twelve inch gong; Chief Williams has one six inch gong.

HORSES

The number of horses in the department is twenty-five which are in good condition, excepting three which will have to be replaced on account of their ages and poor condition. Their ages run from six to twenty-one years.

RECOMMENDATIONS

As we have added the past year one auto combination to the force it will give us better fire protection to the outlying district.

In closing this report I wish to tender my sincere thanks to His Honor, Mayor Shea, for his interest in the welfare of the department, to the Council for all favors rendered during the year; to the City Auditor and Treasurer for all favors rendered; to the Chief of Police and officers for the manner in which they performed their duties at fires; to the committee on fire department for the interest they have manifested in the business of the department; to my associates of the Board of Engineers and to the officers and members for the prompt and efficient manner in which they discharged their duties, thereby maintaining the reputation of the department for efficiency.

PERMANENT MEN

Names	Ages
Capt. Charles P. Costa	64
John Faircloth	53
Faxon Billings	44
James Connell	41
Richard Colbert	49
Herbert Griffin	31
William Lahey	28
Frank Genero	39
Michael Scully	39
Charles Anderson	39
Albert Mead	51
Andrew Scully	35
Jerry Lyons	58
John Dennen	39
William Carroll	31
Daniel McNiece	40
James Malone	46
James Gallagher	40

FIRES AND ALARMS 1910

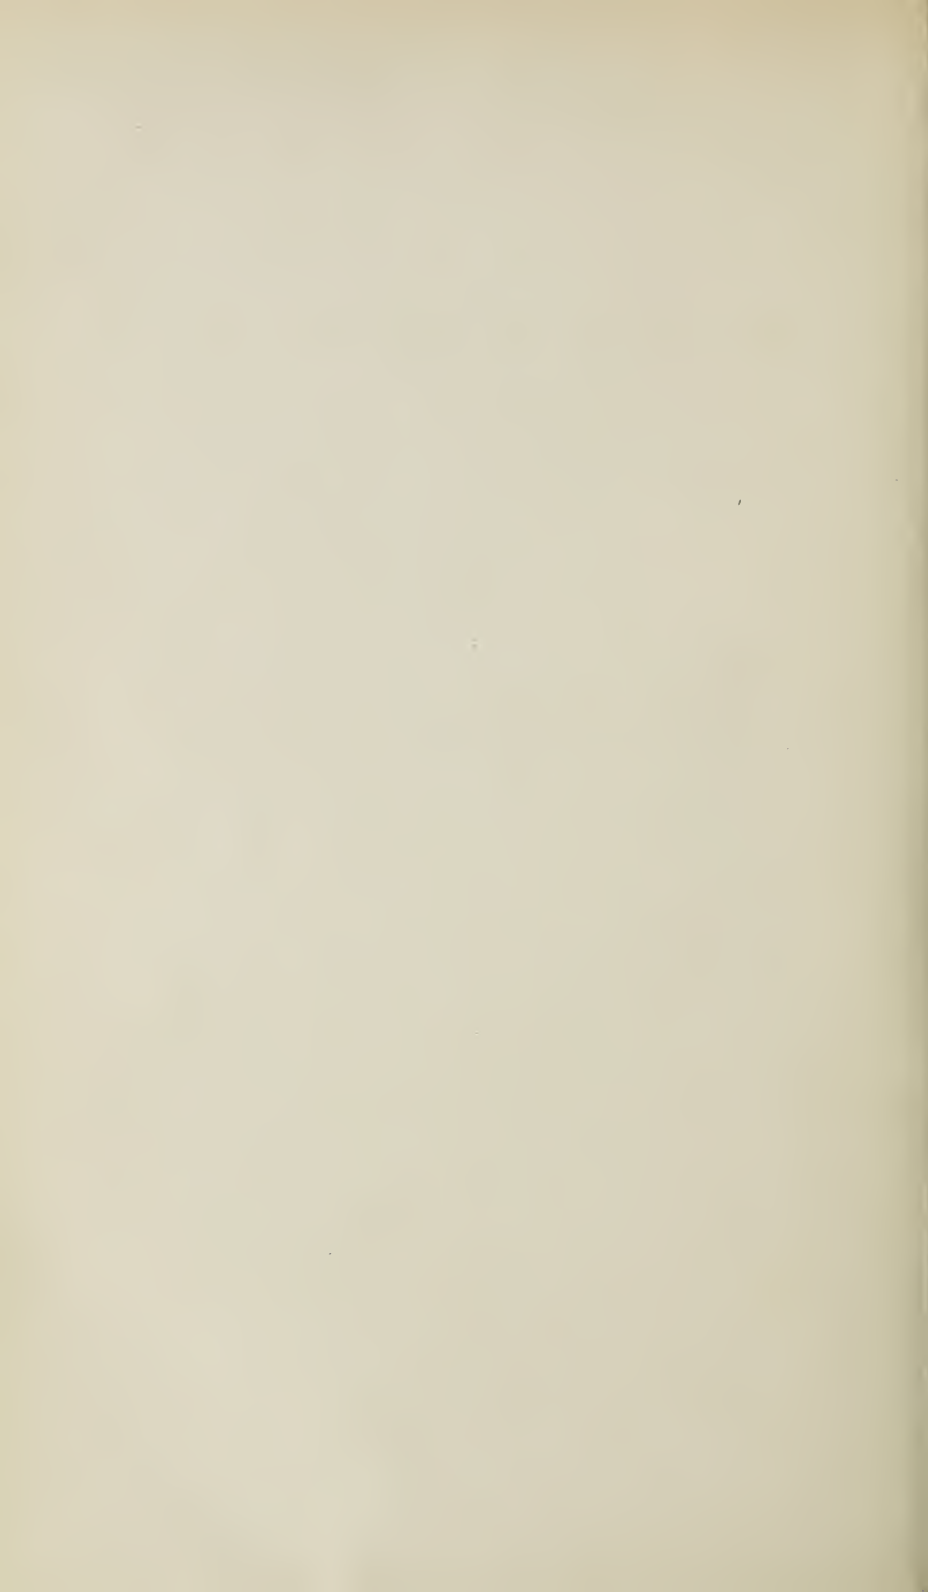

During the year beginning Jan. 1, and ending Dec. 31, 1910, there were two hundred and seventeen alarms (97 bell, 120 still alarms and one general alarm).

Value on property at risk	\$307,709.12
Insurance on property at risk	256,720.00
Loss on property	20,195.31
Value of contents at risk	331,000.00
Insurance on contents at risk	163,900.00
Loss on contents	22,016.20
Making a loss of \$42,211.51 for the year 1910.	

Respectfully submitted,

P. J. WILLIAMS,

Chief of the Quincy Fire Department.

Report of the City Clerk

To His Honor, the Mayor of the City of Quincy:

I submit herewith the twenty-second annual report of this office, being for the year ending December 31, 1910:

Receipts

Amusement licenses	\$661.00
Auctioneers' licenses	12.00
Junk licenses	212.00
Pool and Bowling Alley licenses	69.00
Other Business licenses	292.00
Recording mortgages, etc.,	143.00
Copying records	35.75
Marriage licenses	311.00
Fees for issuing dog licenses	235.80
Other fees and licenses	193.91
Total	<hr/> \$2165.46

The above sum has been paid to the City Treasurer.

Number of marriage intentions recorded in 1910	311
Number of marriages recorded in 1910	327
Number of births recorded in 1910	949
Number of deaths recorded in 1910	457

The number of dogs licensed in 1910 was 1031 male and spayed, 146 female, 2 kennels, for which the sum of \$2842.00 was received. Of this amount \$2606.20 was paid to the County Treasurer, the remainder being included in the above account of receipts, as dog license fees.

Received during 1910 for hunters' licenses, at	
one dollar each	\$197.00
And for hunter's license to citizen not naturalized	15.00
Which amount was paid to the State Treasurer (\$49.00), and	
Commissioners of Fisheries and Games (\$163.00.)	

Annexed are lists of births, marriages and deaths recorded in Quincy in 1910, and the election returns for 1910.

Respectfully yours,

HARRISON A. KEITH, .

City Clerk.

Report of the Building Inspector

Quincy, Mass., January 1, 1911.

Hon. William T. Shea, Mayor.

Dear Sir: In compliance with your request I herewith submit the fourth annual report of the building department. There has been a steady increase the past four years, in the estimated cost of building operations of the city. The total cost in the year 1907 being \$514,597.48 and for the year 1910 the total being \$996,129.60, or nearly a million dollars.

The building this year has been over a more extended area than in the previous years, Wards 2, 3 and 4 having been more active than any year since the building ordinance went into effect. Following is a list of permits issued for new buildings in the year 1910.

DWELLINGS.

Total	<u>\$125.00</u>

Yours respectfully,

MAURICE I. GATCOMB,

Sealer of Weights and Measures.

Board of Health

January 1, 1911.

To His Honor the Mayor of the City of Quincy:

The Board of Health respectfully submit their annual report for the year 1910.

The organization of the Board was as follows:—

William H. Callahan, Chairman,
Francis Ramon Burke, M. D., Secretary,
Cornelius M. Duggan.

The Inspectors of the Board were as follows:—

Edward J. Lennon, Sanitary Inspector,
J. J. Keniley, Inspector of Plumbing,
James F. Allan, Inspector of Meats and Provisions,
Edward J. Murphy, Inspector of Milk.

The appropriations for maintaining the department were as follows:—

Care of Brooks	\$500.00
Collection of Ashes	3,000.00

Collection of Garbage	4,500.00
Scavenger Equipment	3,000.00
Scavenger Maintenance	3,000.00
Abating Nuisances, Contagious Diseases and Miscellaneous	6,277.11
Sanitary Inspection	780.00
Clerical Services	520.00

GARBAGE.

The collection of garbage has been carried on the same as in previous years except that more teams have been necessary and the expenditure has been slightly larger. At times we have been able to use one of the scavenger horses for helping out on the collection of garbage. During the winter months it has been necessary to put on two extra teams at one time and we have been able to make use of the horses used in the Scavenger Department.

ASHES.

The collection of ashes since October, 1910, has not been done by contract work, but the city has collected the ashes with its own teams. During the winter months some of the horses of the Scavenger Department have been available for this purpose. More ashes are being collected than in any year previous and we presume that the amount will steadily increase in the future.

SCAVENGER WORK.

Previous to 1910 the scavenger work of the city was done by contract under the direction of the Board of Health. This method has not proven satisfactory. In May, 1910, the city appropriated \$3,000.00 for equipping an outfit for the

carrying on of the scavenger work under the direction of the Board of Health. At the same time \$2,500.00 was appropriated for the running expenses, this being necessary until some return should come in from the work. In December this appropriation was exhausted and it was found necessary to have \$500.00 transferred from the receipts of the department to carry on the work for the balance of the year. An equipment was purchased consisting of five horses, two tank wagons, two double vault wagons, one single vault wagon, one single tool wagon, one pump with fittings, harnesses, blankets, disinfectant and sundries at an expenditure of \$3,000.00. One of the double vault wagons was very small, but it was all we could buy with the balance that was left. It has proved inefficient. The work started May 23, 1910. Up to January 1, 1911, there has been expended \$2,963.96. There have been 645 orders filled to date, 20 orders now on hand and not done. Bills to the amount of \$2,625.00 have been sent out by the Board. This shows an expenditure of about \$375.00 in excess of the work done. This being the first year that this work was undertaken it took some time before the department was running smoothly and much valuable time was lost at the start. The method of having the scavenger department directly in the hands of the city has proved most satisfactory. Orders are filled promptly, work is done satisfactorily. If the Board had had a satisfactory double vault wagon they would not have been so handicapped.

NUISANCES.

The abatement of nuisances the past year has been carried on much as in previous years. Complaints received at the office were promptly investigated and abated. Five hundred and eighty-six inspections were made by the Sanitary Inspector. One hundred and twenty-eight premises

have been ordered put in proper sanitary condition and fifty-three premises ordered connected with the public sewer. Five hundred and twelve vaults and two hundred and seventy-four cesspools have been cleaned by the city since they assumed the scavenger work in May.

MEDICAL INSPECTION OF SCHOOLS.

The work of medical inspection of schools has been carried on as in former years. There are five inspectors engaged in this work and each school is visited once each week. One hundred and thirty-six children have been examined, twenty-three excluded and forty-four given notes to parents or advised to see their family physician. We wish to again recommend that the compensation of the five inspectors now engaged in the work be increased to two hundred dollars.

LICENSES GRANTED.

The following licenses were granted by the Board in 1910:—

Undertakers	9
Garbage	6
Tallow	2
Stables, permits granted to erect	10
Stables, permits granted to occupy	8
Stables, applications laid on table	3
Stables, applications refused	2
No. of houses disinfected for diphtheria	39
No. of houses disinfected for scarlet fever	44
No. of houses disinfected for tuberculosis	34
No. of houses disinfected for cerebro-spinal meningitis..	1
No. of schoolhouses disinfected	1

CONTAGIOUS DISEASES.

In the spring of this year a tuberculosis camp was started in Quincy enabling the city of Quincy to take care of many of its tubercular patients. Previously it has been necessary to send these patients away from Quincy and in many cases the expense has been very heavy. Although this hospital will only accommodate nine permanent patients, it has proved a great help to the Board of Health as well as a public safeguard in the spread of tuberculosis. The city pays \$1.00 a day to this camp for its patients. The tuberculosis patients that cannot be accommodated there have been sent to hospitals outside of Quincy as formerly. It is to be hoped that some day in the near future the city of Quincy will maintain such a hospital itself which can accommodate many more patients than the present hospital is able to do. Regarding contagious diseases other than tuberculosis, in the city of Quincy the past year, the number of cases reported have been practically the same as for the past two or three years, even although the city has grown exceedingly in population.

The Board recommends the establishment of a special contagious hospital in the City of Quincy for the care of all contagious diseases except tuberculosis and small pox.

Respectfully submitted,

WILLIAM H. CALLAHAN, Chairman.

FRANCIS RAMON BURKE, Secretary.

INSPECTOR OF PLUMBING.

Quincy, Mass., January 1, 1911.

To the Board of Health,

Gentlemen,

As Inspector of Plumbing in the City of Quincy, I have the honor to submit to you my sixteenth annual report for the year ending December 31, 1910.

Number of permits issued 650

Nature of Buildings.

Dwelling houses	408
Factories	4
Stores	5
Pool room	1
Sanatorium	1
Laundries	3
Offices	7
Business block	1
Schools	2
Club houses	2
Garage	1
Steamboat landing	1
Milk room	1
Churches	2
New beach cottages	124
Old beach cottages	53
Railroad station	1

New dwellings connected with sewer	124
Old dwellings connected with sewer	187
New dwellings connected with cesspools	62
Old dwellings connected with cesspools	35
Alterations and additions to existing plumbing	26
Permits cancelled	7

The regulations adopted by your Board obliging the installing of water-closets in all buildings where city water can be obtained has in my opinion removed a great nuisance, as vault closets are no longer allowed to be erected where this regulation can be enforced. The use of Flushometer Valves for the flushing of water-closets where they receive their supply direct from the pressure should not be allowed as they do not work properly when connected in this manner, the pressure being too great for the proper working of the valve. If they are supplied from a tank the result is different and the closet receives a proper flush. The Board of Health is empowered by the ordinance to decide what device is proper for the flushing of water-closets other than a tank. I would recommend that no water-closet be allowed to be flushed direct from the city pressure.

I would also recommend that that part of the ordinance which calls for the proper construction of a box around cleanouts when placed under the cellar bottom be inserted in the building laws as this work is done by the builder and should be placed in the ordinance governing his work.

Respectfully submitted,

(Signed) J. J. KENILEY,

Inspector of Plumbing.

INSPECTOR OF MEATS AND PROVISIONS.

Quincy, Mass., January 1, 1911.

To the Board of Health,

Gentlemen,

I herewith submit my report as Inspector of Meats and Provisions for the year ending December 31, 1910.

Number of inspections	222
Number of licenses renewed	34
Number of new licenses granted	25
1 beef carcass (inspected at slaughter)	950 lbs.
1 veal carcass (inspected at slaughter)	96 lbs.
6 swine carcasses (inspected at slaughter) (est'd)	1,050 lbs.
Number pounds of beef seized	63 lbs.
Number pounds of poultry seized	14 lbs.
Number pounds of veal seized	17 lbs.
Number pounds of fruit seized	6 lbs.

I would here recommend, if constitutional, to charge a fee for each hawker's permit, the money to be turned into the City Treasury. This would have the effect of keeping out of the city many undesirable pedlars.

I wish to thank the Police Department for the splendid work they have done the past year in guarding the entrances to the city, especially at Atlantic, thus compelling hawkers to either come to City Hall and get a license or keep out of the city. To the Chairman and members of the Board of Health, I tender my thanks for the many courtesies received during the year.

Respectfully yours,

JAMES F. ALLAN,

Inspector of Meats and Provisions.

INSPECTOR OF MILK.

Quincy, Mass., January 1, 1911.

To the Board of Health of the City of Quincy.

I have the honor to submit the following report for the year 1910.

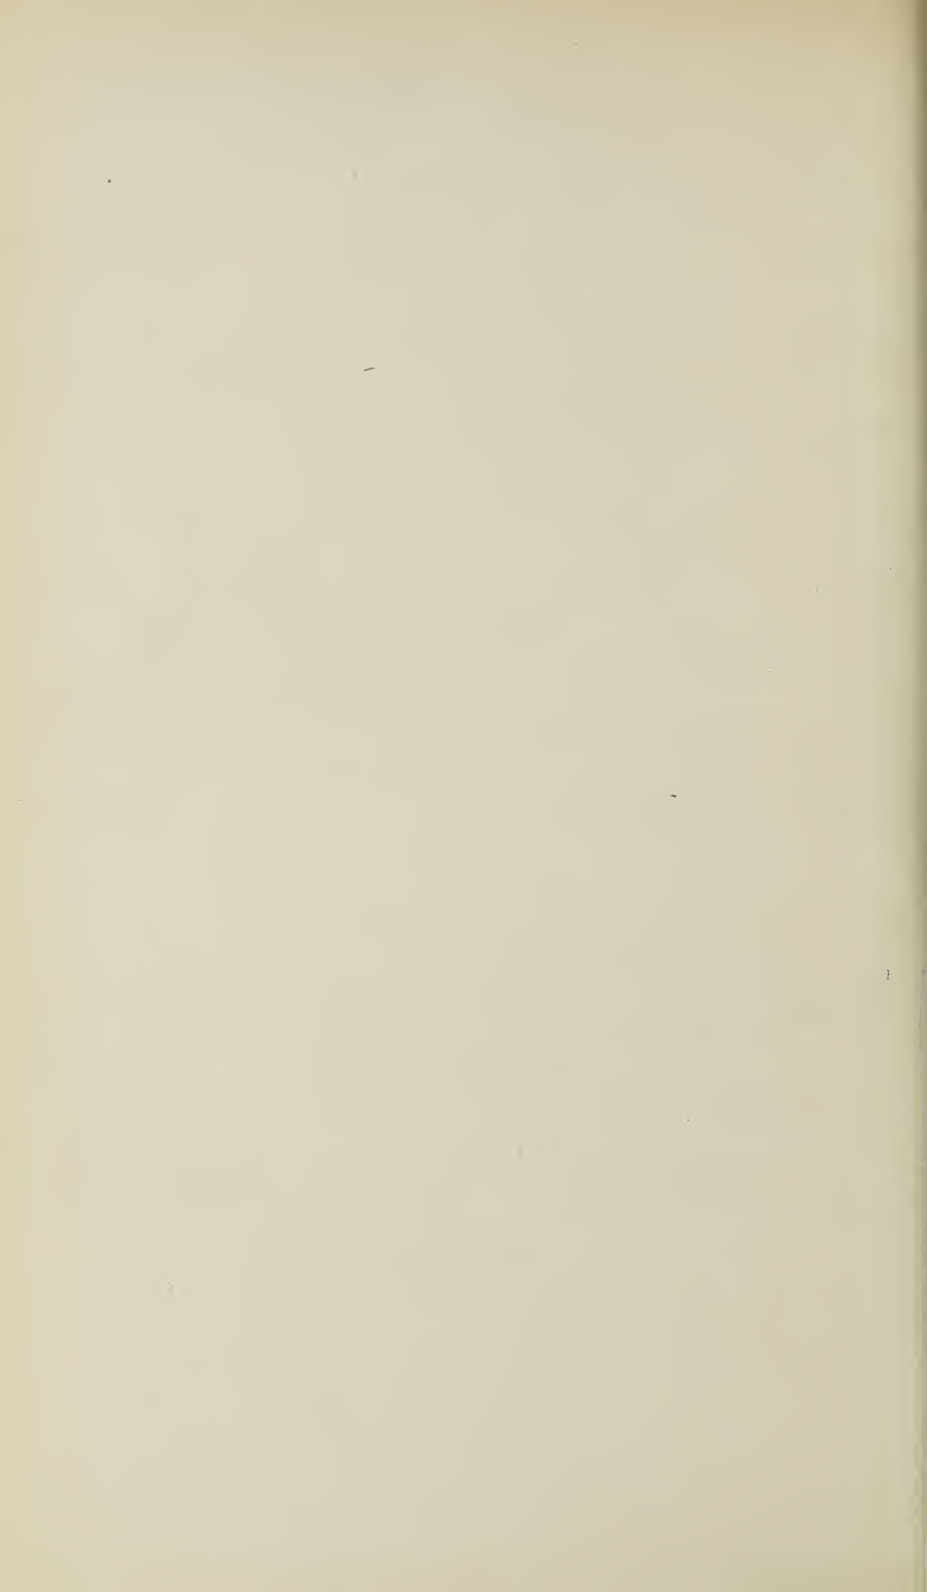

Appropriation		\$50.00
Apr. 5, Lyman A. Chapin, supplies	\$.70	
Aug. 15, Spargo Print	2.00	
Dec. 6, Clerical services	5.00	
Dec. 30, Geo. W. Prescott Co.	5.00	
Postage, transportation, etc.	37.30	
	<hr/>	\$50.00
No. licensed to peddle milk		64
No. stores licensed to sell milk		58
No. licensed to sell oleomargerine		5
Amount received from fees and turned over to City Treasurer		\$42.50

During the past year I have inspected practically every cow stable in the city and with few exceptions found both stables and cows in good condition.

Respectfully submitted,

(Signed) E. J. MURPHY,

Inspector of Milk.

Report of Inspector of Animals

Quincy, Mass., March 1, 1911.

Hon. William T. Shea, Mayor.

Dear Sir : As Inspector of Animals, I present the following report for the past year :

Cows--By order of Dr. Peters, chief of the Cattle Bureau, an inspection of the cows in the city was made in November, 1910. In February, 1911, another inspection was made under order of Mr. Fred Walker, the new chief of the Cattle Bureau. Three Quincy cows have been killed for tuberculosis. An improved condition in the care of cows is noted, bedding being more generally used, with greater cleanliness resulting.

DOGS—Early in 1910 there was one case of dumb rabies.

HORSES—We have had an unusual number of cases of glanders which necessitated the State's closing the watering troughs of the city. Eleven cases from five wards have been killed. Adjoining towns have also suffered from this epidemic. Mange has been added to the list of diseases which must be reported to the State. Three stables containing mange have been reported.

Respectfully submitted,

FRANCIS ABELE, JR.

Inspector of Animals.

Report of City Solicitor

Quincy, Mass., February 1, 1911.

Hon. William T. Shea, Mayor.

Dear Sir : The work of this department during the past years has been largely of a routine nature, such as attending sessions of the City Council, rendering oral and written opinions to the Council and its Committees, preparing city contracts, advising the various city administrative officials as to matters pertaining to their respective departments, adjustment of minor claims for damages on account of injuries to person and property, and attending hearings before Legislative Committees.

Perhaps the most important matter this department has had to do with during the past year, was the re-apportionment of the Metropolitan Park District expenses for the next five years. Early in the year the Supreme Court appointed Ernest H. Vaughan, Esq., of Worcester, Charles G. Bancroft, Esq., of Natick and Frederick B. Hall, Esq., of Taunton, Apportionment Commissioners. Hearings were given by the Commissioners to all the cities and towns of the district. These hearings commenced in the latter part of the Spring and were not

completed till late in the Fall. The report of the Commissioners was made early this year, and was confirmed by a Single Justice of said Court—an appeal taken to the Full Bench of the Supreme Court by the cities of Boston and Cambridge from the portion of the report dealing with the expense of the Charles River Basin. So far as Quincy is concerned the findings of the Commissioners does not materially change its proportion of said expenses except as to the item of Boulevard expenses. The Commissioners increased the amount those municipalities having boulevards should pay, and as a boulevard seems somewhat as a town or city way, there is considerable justice in the position taken by the Commissioners.

The city is still waiting to hear from the Grade Crossing Commission, as to its decision on the Saville and Water Streets crossings. The Commission gave several hearings during 1910 to the city's expert Prof. Breed, and the railroad engineer, but evidently are still unable to decide on the method of abolishing these crossings. The city has done all it can do in the premises until it hears from the Commission.

Respectfully submitted,

JOHN W. McANARNEY,

City Solicitor.

Report of Park Commissioners

To His Honor the Mayor of the City of Quincy:

The report of the Board of Park Commissioners for the year of 1910 is hereby submitted.

Members met early in March and organized as follows: Chairman, Dexter E. Wadsworth; Secy., Charles E. Gill.

On April 7th, death removed from our midst Mr. Wadsworth. It was a great loss to the City of Quincy and the community at large.

The vacancy on the Board was filled by the appointment of Mr. Herbert T. Whitman. Reorganized as follows: Chairman, Charles E. Gill; Secy. Robert E. Foy.

Parks and playgrounds were ready for use in April. New backstops and appurtenances were built on several of the ball fields of a more substantial nature than in the past and should be permanent and lasting. Ball fields at Wards 3 and 6 were improved by filling and grading, a much needed improvement.

Public Bath House accommodated over 21,000 bathers during the summer season, but many women and children were unable to take advantage of the bathing privileges owing to lack of accommodations, and again we urge the necessity of an addition to the present building with at least room for 75 additional lockers for the use of women and children.

This building has been connected with the sewer thus improving the unsanitary conditions.

A part of the bathing beach was sanded and the result has been very satisfactory. Work of that nature should be continued by next year's board.

A small appropriation should be made by The Council to improve the approach to the bath house.

The approach at the present time is inconvenient and unsatisfactory.

Some progress has been made with skating ponds. Several locations have been secured from private parties who are public spirited enough to give the use of their property to the public and the board hopes in time to make arrangements for at least one skating pond in each ward and by so doing encourage this healthful and popular winter sport.

Almost no active work has been done for several years in the way of planting trees and shrubs in our parks and playgrounds. We suggest that an appropriation be made for that purpose.

In June of this year an appropriation and loan order was passed by the council to equip one playground as required by act of 1908.

In selecting a suitable location natural advantages, surroundings and congested districts were considered by the Board and Ward 4 playground selected as farthest removed from parks, beaches and other places of recreation.

Property adjacent to this playground through the kindness of a public spirited citizen has been opened to the public and has added much to the enjoyment and convenience of the children.

The grounds were put in suitable condition to receive equipment which was installed early in July and until the close of the season in October was used by enthusiastic crowds.

Much time and study has been devoted to this matter by the members of this board.

In compliance with the law one additional playground must

be equipped in 1911 and a necessary amount should be appropriated by the Council at an early date to equip and maintain the same.

Respectfully submitted,

CHARLES E. GILL,

ROBERT E. FOY,

HERBERT T. WHITMAN,

Park Commissioners.

Report of City Engineer

To His Honor the Mayor of the City of Quincy :

In compliance with City Ordinance No. 29, I respectfully submit the eleventh annual report of the Engineering Department for the year ending December 31, 1910.

The annual appropriation has been expended as follows:

Appropriation	\$1,800.00
-------------------------	------------

Expended

Pay Rolls	\$1,470.28	
Supplies	218.07	
Miscellaneous	111.65	
	<hr/>	\$1,800.00

The work in this department shows an increase for the past year over any previous year while the annual appropriation was the smallest in the history of the department.

Work has been done for the various departments as follows ;

CITY COUNCIL.

For the City Council and Council Committees 28 street plans and 3 real estate plans have been prepared and 38 estimates and 18 street orders have been submitted. *

The following streets or portions of streets have been accepted and laid out as public highways during the year :

STREETS OR PORTIONS OF STREETS LAID OUT AS PUBLIC WAYS 1910.

Name	From	Accepted	Ward	Length Feet	Width Feet
Ballou Street,	Robertson St. to Bryant St.	1910	4	268.60	33

Total				7,814.36	

or
1.480 Miles
79.511 Miles

Previously Accepted

Total
80.991 Miles.

Of the above named streets all but Oakland Avenue have been laid out under the law authorizing the assessment of betterments upon the abutters.

CITY SOLICITOR AND POLICE DEPARTMENT.

Such surveys and plans as have been requested by the City Solicitor and the Chief of Police have been made by this department. In all 12 surveys have been made and 6 plans prepared for cases pending against the City.

Such information as has been requested has been furnished to the City Solicitor for use before the Commission considering the elimination of the Grade Crossings on Water street and Savil street, and for hearings before the Legislative Committees at the State House.

PUBLIC BURIAL PLACES.

All burial lots sold during the year in the Mount Wollaston Cemetery have been staked by this department and grades have been given for regarding portions of the Cemetery as requested by the superintendent.

A plan showing the exact measurements of the lots in the older portion of Mount Wollaston Cemetery should be made some time in the near future as the original plan of the cemetery has been found to be somewhat inaccurate and does not give exact distances.

PUBLIC WORKS DEPARTMENT.

HIGHWAYS.

Lines and grades have been given for the construction of all new streets built and for all streets rebuilt during the year. In addition, street lines and grades have been given in 20 instances at the request of the Commissioner of Public Works.

Lines and grades have been given in 58 instances at the request of property owners on accepted streets.

Grades were given for the paving of Hancock street on the westerly side from nearly opposite Merry Mount avenue to opposite Albion road.

The result of the measurement of the work is as follows :

New paving laid	5,053.67 sq. yds.
New crosswalks laid	66.63 " "
Paving relaid	616.00 " "
<hr/>	
Total ,	5,736.30 " "

SURFACE DRAINAGE.

Plans have been prepared and grades have been given during the year for the construction of drains for surface water as follows :

SURFACE DRAINS BUILT DURING 1910.

Street	From	Ward	12in.	10in.	8in.	Man holes	Catch basins
Atlantic St.	E. Squantum St. to North St.	6		710.0	1,154.0		10
Beach St.	Billings Road southerly	5			245.0		2
Bedford St.	Whitwell St. to Maywood Ave.	1		188.7	30.0		3
Billings Road	Sachem's Brook to Beach St.	5		370.3			1
Billings Road	Rawson Road to Pierce St.	6	750.0	500.0	235.0	1	7

Total			18,426.14	11,923.63	1,141.04

Schedules for the assessment of sidewalks built in 1909 were submitted to the Commissioner of Public Works early in the year.

WATER DEPARTMENT.

Very little work has been done for this department during the year. Early in the spring a plan of the City was prepared which when completed will show the water system as constructed to date.

SEWER DEPARTMENT.

All sewers built during the year were laid out on the ground by this department. Record and assessment plans of the work have been filed with the Sewer Department. About 4 67-100 miles of sewers were constructed, a schedule of which may be found annexed to the report of the Commissioner of Public Works.

PUBLIC BUILDINGS AND GROUNDS.

A contour plan for grading the Atherton Hough school lot was prepared and grades set to carry out the work.

Contour plans have also been prepared for the Wollaston and Montclair school lots.

ASSESSORS PLANS.

The Assessors plans have been corrected to agree with recent transfers of property, location of new buildings and new sub-divisions of property made during the year.

The Building Inspector issued 721 building permits during the year, all of which have been looked up on the ground and new buildings and additions have been located and plotted.

At the present rate the number of transfers of property in the city from April 1st, 1910 to April 1st, 1911 will amount to about 2000 in number, the most active year in real estate in the history of the city.

I believe that this work could be much better cared for if it were possible to keep one engineer on the work throughout the year.

An additional appropriation of \$1,000 was made during the year to complete the Assessors Plans of Ward 4. The plans of one precinct are practically completed and I hope to be able to finish the plans of the entire Ward early in the year.

HOUSE NUMBERING.

A determined effort has been made during the past year to have the buildings in the city numbered in conformity with the ordinance relating thereto. The entire city has been gone over and about 1,000 doors have been numbered. I intend during the coming year to follow this work up and number all buildings now un-numbered.

House numbering plans have been made of about 120 additional streets during the year and plans are now complete for every ward in the city with the exception of Ward 4.

Yours respectfully,

EZEKIEL C. SARGENT,

City Engineer.

Report of the Commissioner of Public Works

To His Honor, the Mayor of the City of Quincy :

Sir: Please find herewith the twenty-first annual report of the Commissioner of Public Works for the departments under my direction for the year ending December 31, 1910. The Budget appropriations, special appropriations, expenditures and balances for the Department of Public Works for the year 1910, are as follows:

ANNUAL BUDGET

	Appropriation	Expended	Balance
Bridges, culverts and drains	\$2,500.00	\$2,467.05	\$32.95
Clerical	780.00	780.00
Removal of snow	6,000.00
Balance 1909	339.28	5,853.65	485.63
Miscellaneous	250.00	249.98	.02
Repair of public buildings and care of City Hall ..	8,000.00
Balance 1909	159.15
Transfer from Street Lighting	800.00	8,202.60	756.55
Miscellaneous Highways ..	25,000.00
Balance 1909	392.89
Receipts	4,104.13	28,007.99	1,489.03

Street Lighting	30,200.00
Balance 1909	25.00	29,717.62	507.38
Street watering or oiling..	8,000.00	8,000.00
Gypsy Moths	5,000.00
Balance 1909	1,468.44
Receipts	1,707.06	6,303.61	1,871.89

SPECIAL APPROPRIATIONS

	Appropriation	Expended	Balance
Ballou street	\$725.00	\$2.70	\$722.30
Bedford street	2,250.00	244.85	2,005.15
Belmont street	3,300.00	4.10	3,295.90
Birch street	1,575.00	3.90	1,571.10
Brook street	1,500.00	1,500.00
City Hall vaults	3,000.00	242.65	2,757.35
Claremont avenue	1,800.00	1,800.00
Crescent street	2,000.00	2,000.00
Cross walks	800.00	465.50	334.50
Drinking fountains, school buildings	350.00	110.64	239.36
East Howard street side- walk	330.00	330.00
Excise tax	8,357.96	8,357.96
Fayette street	1,325.00	3.15	1,321.85
Furnace avenue	1,000.00	1,000.00
Germain avenue	3,350.00	6.35	3,343.65
Goffe street gravel sidewalk	120.00	117.00	3.00
Hancock street paving	20,000.00	17,438.97	2,561.03
Hill street	750.00	2.75	747.25
Houghs Neck school house	2,000.00
Balance 1909	18,000.00
Transfer	1,000.00	15,897.05	5,102.95
Houghs Neck school house furnishings
Balance 1909	1,000.00	3.75	996.25

John Hancock school heating	6,000.00	5,959.57	40.43
Larry place rebuilding	500.00	500.00
Marsh street rebuilding ...	400.00	400.00
Merrymount road	1,700.00	1,700.00
Montclair school house ...	45,000.00	45,000.00
Oak street rebuilding	400.00	400.00
Oakland avenue	825.00	825.00
Permanent sidewalks, tar concrete	17,600.00	14,993.88	2,606.12
Permanent sidewalks, granolithic	1,100.00	1,100.00
Phipps street concrete sidewalk	900.00	829.38	70.62
Pleasant street	900.00	900.00
Plymouth street	1,600.00	3.05	1,596.95
Police station plumbing ...	400.00	400.00
Richie road	2,175.00	2.70	2,172.30
Royal street	1,950.00	5.55	1,944.45
School chairs, purchase of.	792.00	757.88	34.12
South Walnut street rebuilding	2,800.00	2,800.00
Steam roller, purchase of..	3,000.00	3,000.00
Surface drainage	12,140.00	11,384.34	755.66
Trafford street	3,000.00	3,000.00
Washington school fence ..	204.00	188.64	15.36
West street rebuilding	3,500.00	3,500.00
Whitwell street sidewalk..	1,400.00	1,380.79	19.21
Willard street retaining wall	600.00	600.00
Wollaston school house ...	75,000.00	75,000.00

1909 APPROPRIATIONS

	Appropriation	Expended	Balance
Brook road paving			
Balance 1909	\$258.57	\$258.57

Coddington school furnishings			
Balance 1909	28.69	17.00	\$11.69
Cummings avenue			
Balance 1909	90.14	21.20	68.94
East Squantum street			
Balance 1909	8,000.00	6,058.99	1,941.01
Franklin avenue			
Balance 1909	74.10	40.00	34.10
Holbrook road			
Balance 1909	85.05	40.00	45.05
Lincoln school additions...			
Balance 1909	1,950.06	1,950.06
Lincoln school furnishings.			
Balance 1909	290.07	218.00	72.07
Murdock avenue			
Balance 1909	3.52	3.52
Newbury avenue surface drain			
Balance 1909	250.00	55.50	194.50
Newcomb place			
Balance 1909	214.59	192.21	22.38
Permanent sidewalks, tar concrete			
Balance 1909	61.57	35.42	26.15
South street rebuilding			
Balance 1909	1,490.37	1,471.39	18.98
Whitwell street sidewalk			
Balance 1909	93.49	93.49

The City Council passed sixty-eight orders, including transfers and receipts, aggregating \$460,291.96, to be expended under this department, divided as follows:

Street construction	\$73,187.09
Surface drainage	12,140.00
Public buildings, construction and repairs.....	132,746.00

Permanent sidewalks	21,450.00
Purchase of steam roller	3,000.00
Gypsy Moth receipts.....	1,707.06
Water construction and receipts	48,910.85
Water meters	10,000.00
Sewer construction, main and house connection receipts	57,440.96
Budget	99,710.00

The balance of thirty-two orders passed by the Council related to pole locations, laying of gas mains, acceptance of streets, preparing polling places, etc.

BUDGET APPROPRIATIONS

BRIDGES CULVERTS AND DRAINS

Bills approved on this account amounted to \$2,467.05, charged as follows:

Fore River Bridge, assessments	\$825.00
Hingham Bridge, assessments	100.00
Neponset Bridge, replanking	914.89
Beale Street Bridge, painting and replanking.....	163.06
Bates Avenue Bridge, replanking	68.65
Smith Street Culvert and Drain	75.00
Warren Avenue Bridge, painting	79.31
John Hancock School Bridge, construction and repair	121.00
Repairing minor bridges	74.14
Cleaning drains	46.00

The Fore River bridge is not directly under the control of this department although minor repairs are supervised by it. The whole appropriation would not pay for more than half the city's share of the repairs needed on the bridge and piers.

The city pays 5-24 of the up keep of the Hingham bridge on demand of the Bridge Trustees.

Neponset bridge had new wearing plank and partly new deck plank this year but the whole top of the bridge, including girders, stringers, deck and wearing plank will need a thorough overhauling within two years, perhaps next.

The short bridge on Squantum causeway was changed to a concrete culvert and the bridge on Merrymount road can be shortened and concreted next year when the street is built.

Wherever the substructure is strong enough to carry a permanent floor this should be done as the life of any much travelled plank floor is hardly three years.

GYPSY AND BROWN TAIL MOTHS

The experience of the last two years has proved that we need another sprayer for this work as it can be done better and cheaper by machine than by hand. The spraying season is short and one machine, even working overtime, cannot cover the ground properly and I would recommend that another machine be purchased early next year so that the hand work may be cut down and the more efficient spraying substituted.

A portion of the spraying was done for the Elm Leaf Beetle which did such havoc a year ago and it was a pleasure to see how much good the spraying did, but it showed also the need of another sprayer as we could not cover the whole city properly.

Of course these pests are a nuisance and a burden and we do not get ahead, but it is just like moths in a suit of clothes, if you do not get rid of them you will not have the clothes. A look at some other places will prove this to our citizens.

REMOVAL OF SNOW.

With a few exceptions our own teams do the best work

on snow plowing because they are out early and know the work must be properly done. A number of ploughs had to be given to other parties this year as the contractors said there was no money in ploughing at fifty cents per hour. This caused some trouble with the new routes, but that has been remedied.

Every one that enters a complaint is thanked for their trouble because it helps to keep the three hundred miles of sidewalks ploughed out.

STREET WATERING

Bills and pay rolls approved on this account amounted to \$8,000.00, charged as follows:

Standard Oil Co.	Emulsion Oil	52,467 gals.	\$2,636.35
Gulf Refining Co.	"	24,161 "	1,208.05
The Texas Co.	Road Oil	24,721 "	827.27
Headley Good R'ds Co.	Terracolio	3,850 "	496.83
Barrett M'fg. Co.	Tarvia	1,500 "	114.00
N. Y. N. H. & H. R. R.	Freight		260.38
Labor and transfer			2,367.68
Misc. and repairs			89.44

Water and five other substances were used during the season to lay the dust and help preserve the road surface depending on the nature of the roadway.

Where there are car tracks and the street is all paved there is no question in my mind but what the Electric Car Sprinkler does the best work at the minimum cost. Under present conditions it cannot be used to advantage as it will not cover satisfactorily more than one fourth of the streets and the cost of the car is nearly one half the appropriation for street watering.

All of the materials used were supposed to have either tar or asphalt as their base, the balance of the liquid being a means to hold this base until applied to the road surface.

Which is the best, tar or asphalt for this work I cannot say and as far as I can see no one else can at the present time.

Instead of trying to lay the dust on a street we should remove this dust before using any oil, fill the depressions and then paint the surface of the road, so the asphalt or tar will stick to stone and not to dust.

We have practically five kinds of roads to treat, namely 1, paved; 2, paved and macadam or gravel; 3, macadam thoroughfares; 4, macadam side streets, and 5, gravel-earth roads, and it is not a question of what you want to do but what you can do with the money available.

STREET LIGHTING

Bills approved on this account amount to \$29,717.62, charged as follows:

Citizens Gas Light Co.	\$2,018.64
Quincy Electric Light & Power Co.	27,698.98

The following table will show number of lights installed January 1, 1910, number installed during the year, present installation, hours per night and nights per month:

Installed Dec. 31, 1909	Cost per year.	Added 1910	Installed Dec. 31, 1910.	Hrs. per Night.	Night per Mos
*Citizens Gas Light Co.					
31 scattered	at \$23.00	6	37	10.5	30.4
72 Hough's Neck	at 19.00		72	10.5	29.0
Quincy Electric Light Co.					
170 Arc	at 87.50		170	10.5	29.0
805 Series	at 18.75	67	872	10.5	29.0
1 "	at 40.00		1	10.5	30.4

*These lights burn all night and every night.

The new contract made with the Quincy Electric Light & Power Company, which expires November 10, 1912, gives us our street lighting on very good terms.

REPAIR PUBLIC BUILDINGS

The amounts expended on the various buildings are as follows:

School Buildings

Adams	\$35.23	
Atherton Hough	80.41	
Coddington	162.22	
Cranch	226.20	
Gridley Bryant	282.00	
High	583.76	
John Hancock	917.50	
Lincoln	119.20	
Massachusetts Fields	383.98	
Quincy	61.01	
Washington	145.92	
Willard	459.48	
Wollaston	162.02	
	<hr/>	\$3,618.93

Fire Stations.

Central Fire Station	\$261.12	
Hose House, Ward 2	21.19	
Hose House, Ward 4	176.43	
Hose House, Ward 5	48.98	
Hose House, Ward 6	50.20	
Hose House, Houghs Neck	158.46	
	<hr/>	716.38

City Hall

Lighting	\$531.16	
Fuel	432.88	
Telephone	93.31	
Janitor services	1,186.75	
Miscellaneous	944.63	
	<hr/>	3,188.73
Police Station		167.92
Alms house		178.47
Stables		332.17
		<hr/>
Total		\$8,202.60

The increased Budget appropriation has enabled me to make some of the repairs more permanent, pick up loose ends which have had to be slighted for some years and also make some improvements to the plant, a few of which are as follows:

New boiler at City Hall, retubing boilers at Cranch and Massachusetts Fields schools, additional radiation at High and Coddington schools, additional radiation and overhauling of piping system at the Wollaston hose house, electric lights at the Cranch, Massachusetts Fields and Gridley Bryant, new transformer system for clock system at the High school, new main steam valves at the High school, changing lecture room into cooking room at the High school and changing plumbing and lighting for the same, and painting and tinting at the Willard and John Hancock schools.

At last the Houghs Neck hose house is going to have a good painting, but as it has been neglected so long I have been obliged to sand paper, scrape and oil this winter and leave the painting until spring. If this work had been done two years ago we could have saved practically the cost of the whole painting job as this preliminary work would not have been required.

Changing the heating plant at the John Hancock school

made a lot of repair work on the building and this had to be done out of this appropriation as the estimate for the heating plant was cut too much.

The slate roofs on our schools are a nuisance, every school roof excepting one leaked some time during the year and as a rule I do not think it was poor workmanship. There is too much shrinkage and too much give to a large roof with wooden trusses to use slate and I am glad our new schools have flat roofs.

SPECIAL APPROPRIATIONS, ROAD CONSTRUCTION—EAST SQUANTUM STREET

About six thousand dollars was expended in building a portion of this street from the boulevard toward Squantum. Enough money is on hand to do the rip-rapping but as the road to the Aviation Field has been built and it breaks the waves from this quarter the stone has not been put in place.

The winter's storms will show whether it is needed or not and it may be done in the spring if needed. A fence has been built on the northerly side and the railroad company have raised their track on the southerly side of the street to conform to the new grade.

I did not finish the work agreed to be done for the Land Company, who gave all the filling for this street, but after the teaming is finished it will be an easy matter to do this work.

OAK AND SOUTH WALNUT STREETS.

A stone road five and six inches respectively have been built on these two streets and a small amount of work done on the sidewalks and I think with a little care these streets will last a good many years.

A portion of South Walnut street was constructed of

crushed granite and tar—tar macadam—and it will be a good chance to prove its value, as I put it on the hardest part of the street to maintain (the flat portion).

The hot tar was put into the road, not on it, in two layers of stone and certainly made a fine piece of roadway. On account of the saving in stone and rolling this method cost very little more than water bound macadam and as we have no good trap rock in Quincy I hope that some method on these lines may be developed for our roads.

PERMANENT SIDEWALKS

Under this work may be classed the following appropriations.

1	Permanent sidewalks, tar	\$17,600.00
2	Permanent sidewalks, granolithic	1,100.00
3	Phipps street sidewalk, tar	900.00
4	Whitwell street sidewalk, gravel and curbing.	1,400.00
5	Goffe street sidewalk, gravel and curbing	120.00
6	East Howard street sidewalk, gravel and curb- ing	330.00

Bills for labor and materials under item 1, amounted to \$14,993.88, divided as follows:

Labor as per pay rolls	\$3,637.94
Simpson Bros. Cor., tar concrete	9,516.83
Curbing	1,045.78
Setting curb	154.79
Loam and sods	27.27
Incidentals	107.88
Henry Lavelle, labor and material	503.39

Two bids were received on this work as follows:

Lowe Armington Co., 68 cents per sq. yd.

Simpson Bros, Cor., 63 cents per sq. yd.

The latter bid was accepted and the work done was satisfactory. Some of the work was three inch and some of it four inch work depending on the amount of traffic, foundation underneath the walk and character of the soil.

2.

A small amount of granolithic sidewalk was laid this year and where the curbing can be omitted the cost is much less to the city and abutter than a tar walk and curbing.

There is no question about the relative looks of the two kinds of walks and a granolithic walk properly laid will be as good as new and giving good service when a tar concrete walk under the same conditions would be ready for the dump.

The betterment to abutters and city is double that of a tar walk and costs no more if the added life is considered.

By this I do not advise the indiscriminate use of granolithic walk as under certain conditions the tar walk is preferable. Every locality should be treated consistently and the work deferred until the proper kind of work for that section can be done. If this is too broad a proposition I think the least the city can do is to carry out each street on a uniform basis of construction.

Tree roots are one of the worst enemies of our sidewalks and for this reason the permanent walks on all residential streets should be made as narrow as travel will admit. For the ordinary residential street a four foot walk, three and one-half foot turf border and curbing or paved gutters make a good layout. This treatment serves the pedestrian, allows the roots under the walk to be cut off entirely at the same time giving the tree a chance to feed on the additional loam space, the curb and paved gutter will protect the turf border, define the gutter and add to the permanency of the work but at the present time where so many of our sidewalks, built of binding gravel, are so full of mud just where needed the most, I think the curbing should be omitted temporarily and thus twice as many miles of sidewalks may be constructed.

Permanent sidewalks cannot be built too well to stand our

climate and I think the city should do all this work in every case especially as under the law it must forever maintain this walk free of charge to the abutter.

The Phipps street sidewalk and curbing was a much needed improvement and in place of the old ragged sidewalk we now have a good permanent walk on this thoroughfare.

4—5—6

The work on these three streets is not quite finished although practically so. These streets are a good example of streets on which curbing is absolutely necessary as they are not any too wide for teaming nor the sidewalks for travel. The city ought to do two miles of this kind of work every year in place of some of our more temporary work.

ACCEPTED STREETS

There were twelve streets accepted by the City Council of 1910 during the latter part of the year, the bulk of which were accepted under the law authorizing the assessment of betterments.

The money for this work will be available about the first of 1911 and in the mean time the work can be planned to much better advantage than though the work had to be done in a hurry. To my mind this is the best way to appropriate the money for work which needs careful planning to get the best results. If this was done every year and the money made available the first of the year the next season's work could be much better planned and a considerable saving made in the cost of the work.

STREETS ACCEPTED IN 1910.

Name	From	Accepted	Ward	Length Feet	Width Feet
Ballou Street,	Robertson St. to Bryant St.	1910	4	268.60	33
Bedford Street,	Glendale Rd. to Roselin Ave.	1910	1	904.00	40
Belmont Street,	Lincoln Ave. to South Central Ave.	1910	5	1,070.00	40
Birch Street,	Glover Ave. to Hollis Ave.	1910	6	575.00	32-40
Claremont Avenue,	Chubbuck St. to South St.	1910	2	487.00	36
Fayette Street,	North Central Ave to Hobart St.	1910	5	500.00	40
Germain Avenue,	Washington St. southwesterly	1910	2	1,123.56	40
Hill Street,	McDonald St. southeasterly	1910	4	246.20	25
Oakland Avenue,	Newport Ave. southwesterly	1910	5	620.00	50
Plymouth Street,	Independence Ave. to Verchild St.	1910	3	478.00	36
Richie Road,	Franklin St. to Kendrick Ave.	1910	3	610.00	40
Royal Street,	Billings Road to Vassall St,	1910	5-6	932.00	40

Previous to January 1, 1910, the number of miles of accepted streets was 79.51 and adding to this the amount accepted during 1910, 1.48 miles, we have total number of miles of accepted streets January 1, 1911, 80.99 miles.

SURFACE DRAINAGE

Drains for eighteen streets were included in this appropriation and bills for labor and materials amounted to \$11,384.34 divided as follows:

Labor as per pay rolls	\$6,732.75
Akron pipe and brick	3,020.56
Cement	366.28
Manhole and catch basin castings	582.69
Mason work	263.09
Curbstone inlets	247.40
Incidentals	171.57

This work was begun about the first of August by two gangs, whereas, to get the best results it should have begun two or three months earlier. Our supply of foremen is limited and it is the foreman that counts on this kind of work. Drains are built near the surface and have to dodge water pipes, gas pipes, electric conduits, trees, poles and other things so that a competent man is needed as catch basins and pipes must be built accordingly. For this reason an early appropriation should be made for this work.

The amount of work done was as follows:

Laying 275 feet 12-inch pipe.
 Laying 3,497 feet 10-inch pipe.
 Laying 3,407 feet 8-inch pipe.
 Building 7 manholes.
 Building 70 catch-basins.

For a detailed account of the work done during the year, see the report of the City Engineer.

HOUGHS NECK SCHOOL

The Atherton Hough school, as it is now called, has been under construction since the middle of April and will be completed before long.

With the exception of the heating and ventilating, which was done on time and according to contract, the rest of the job has been unsatisfactory, principally on account of delay in the plumbing.

The stock and materials on the work are all right, the trouble has been with the workmanship, but when completed I think the building will be as complete and substantial as any in the city and in some respects better.

The building is heated by a combination of hot air and steam with provision for returning the air from the class rooms, when school is not in session, back to the heaters.

This "rotary system" as it is called allows the school to be kept at an even temperature night and day without taking in any outside air.

As usual there was practically no money for grading the lot and if it had not been an exceptionally fine lot of land with good loam and nearly to the proper grade it could not have been done under the appropriation.

There is nothing more important than the grading about a building and it costs money just the same as anything else does but when the appropriation is made the "and grading" is put in but not the money to do it.

JOHN HANCOCK SCHOOL

Special Appropriation for Heating and Ventilating

Bills for labor and material on this work amounted to \$5,959.57, divided as follows:

Labor as per pay rolls	\$481.15
------------------------------	----------

Heating contract	4,998.00
Iron work and hardware	25.62
Lumber	178.07
Mason work	150.00
Cement and brick	90.59
Incidentals	36.14

Bids were received as follows:

Stone Underhill Heating & Ventilating Co.	\$4,998.00
Lynch & Woodward	5,370.00

At the time the bids were opened I was disappointed in not receiving more bids on the work, but after the work was completed there was no room for regrets, in fact this has been the most satisfactory job I have had since my connection with the city. The contractors carried out the contract in every way, the work was finished on time and when inspected by the State Police, more than met the requirements of the law.

There was considerable prejudice against sectional cast iron boilers, whereas, this was the only practical solution of the work, enabling us to have a light boiler room, a chance to remove ashes satisfactorily and finish the work on time and within the appropriation.

SEWER DIVISION.

The following is a brief report of the work of the Sewer Division for the year 1910.

In April 1910, a loan of \$40,000 was contracted for sewer construction and later an additional loan of \$10,000 to perform the work asked for in several new petitions.

Work was begun in May and was carried on continuously throughout the season to December 28, 1910. The work was performed by day labor, two gangs of men being employed constantly and during a part of the time a third gang. When

the work on particular sewers was slack these men also were employed on construction of the main sewers. Unquestionably the extremely dry season helped us in our work but on the other hand several of the streets in which we built sewers contained a considerable quantity of ledge. About 4.68 miles of pipe sewers were built ranging in size from 8 inches to 18 inches in diameter.

Approximately half a mile of sewer was built in Hough's Neck. 667 feet of 18 inch main sewer was built in Island avenue from the new State Pumping Station to Sea avenue. This main ought to be extended early in the season in order to bring it to a point beyond where it will interfere with the summer traffic and also to enable the most thickly settled portion of Hough's Neck to use this sewer by the time the summer cottages are opened.

Appended to this report is a table showing the names of streets in which sewers have been built this year, the location, length, size, kind of material encountered and number of manholes. Also a table showing the amount of each size sewer built each year and the total amount to date.

Record plans have been made by the City Engineer and placed on file in this office. They show a total of 770 assessments amounting to \$24,093.98. If it were possible to assess the property on Island Avenue this year the assessment would aggregate \$25,000. Rights of way have been taken and paid for and releases signed to city and placed on record.

PARTICULAR SEWERS.

The work of making house connections with the public sewer has been carried on this year the same as last and 344 connections have been made connecting 348 buildings. Below will be found various tables in relation to this work.

By Wards.

Police Station	1
<hr/>	
Total buildings	348

Average length per connection	46.40 feet
Average cost per connection	\$21.49
Average cost per foot	\$0.463

The work of cleaning and flushing has been carried on in the usual manner. On the whole the sewers are in a very good condition very few sections giving any appreciable trouble. A few of the house connections have given trouble from roots working their way into the pipes.

There are several petitions on file in this office for the extension of the system and some of these are especially urgent and ought to be taken care of next year.

Net bonded Water Debt		\$665,500.00

Construction Work

The receipts and expenditures on this account are as recited above and the amount of work done as follows:

Extension of mains in 77 streets, varying in size from four inches to twelve inches, aggregating 26,533 feet.

1576 feet of 6 inch and 8 inch mains were purchased from the City of Boston, making the total number of feet added to the system 28,109 or 5.32 miles. (See appended table.)

32 fire hydrants were set on new mains and two were purchased from the City of Boston, making the total number of hydrants in use 812. (See appended table.)

The mains purchased from the City of Boston were as follows:

Beale Road 170 feet 8 inch cast iron	\$442.22
Bellevue Road 739 feet 6 inch cast iron	490.00
Titus Road 667 feet 6 inch cast iron	141.88
Green Street 2 inch service pipe	200.00

In addition to this it was necessary to lay several thousand feet of temporary pipe for summer cottages at Hough's Neck and Squantum.

With the exception of the 12 inch main on Adams Street all of the main extensions were for the purpose of supplying new takers. This 12 inch main will replace an old four and six inch line and will greatly reinforce the service in the Centre and Point Districts.

Consumption of Water

Estimated total population	32,642
Estimated population supplied	31,000
Total consumption for the year	1,065,400,100 gallons
Percentage on consumption metered	.28
Average daily consumption	2,891,900 gallons
Gallons per day to each inhabitant	88+
Gallons per day to each service	145,805
Cost of water at the Metropolitan meter per 1000 gal. \$.047+
Cost of supplying water per 1000 gallons figured on cost plus maintenance	\$.058+
Total cost of supplying water per 1000 gallons figured	

on total maintenance plus interest on bonds \$.08+

Statistics relating to Distribution service.

Penn's Hill standpipe holding 411,302 gallons:

Elevation at top 248.65 feet

Forbes' Hill standpipe holding 330,000 gallons:

Forbes' Hill reservoir holding 5,000,000 gallons:

493 services were laid at a cost of \$12,229.31 of which the city paid \$6,042.69 and the owners \$6,186.62.

Water Meters

Late in the year the city made a contract with the Hersey Manufacturing Co. for 800 to 1,000 5-8 inch water meters and these will be all set by the first of February and another thousand could be easily set before spring if we had them.

On this one thousand meters the City saved three thousand dollars over what it would have cost if the meters had been bought a few at a time and set on scattered services.

Meters in use Dec. 31,2,032

Meters set in 1910602

Total now in use2,634

The details regarding the make, number and size of meters in use may be seen in the following table:

Statistics relating to Distribution Plant

Mains

Kind of pipe, Cast Iron and Kalamein.

Sizes, 4 inch to 20 inch.

Extended during the year 22,036 feet.

Purchased from the City of Boston 1576 feet.

Total now in use, 612,953 feet.

Number of Fire Hydrants added during the year	34
Number of Fire Hydrants now in use	812
Number of Gates added during the year	62
Number of Gates now in use	1486
Number of Street watering Stand-pipes	50
Number of Street watering manhole gates	8
Number of Public Fountains	10
Range of pressure on mains, 35 to 90 pounds.	

Services

Kind of pipe, Cast Iron, Lead, Galvanized Iron and Lead Lined.

Sizes, 3-4 inch to 8 inch.

Extended during the year on City's account....	7,443 feet
Extended during the year on owners' account....	17,765 feet
Number of services added during the year	493
Number of renewals	45
Number of services now in use	7,307
Average length of service	46+ feet
Number of meters set during the year	602
Number of meters now in use	2,634
Percentage of services metered	36+

During the year small plans of the location of every stop gate have been made which will prove of much value as time goes on.

Gates on large mains were closed and opened again to see that they were in proper condition, every hydrant was inspected at least once and put in proper condition.

During the year a provisional appointment was made of Mr. John G. Whitman as superintendent of the department and there is no question in my mind but what he will make just the man for the position.

Tables relating to work done during the year and the distribution plant are annexed hereto and a list of material on hand may be found on file.

In closing I wish to thank my foreman and clerks for their co-operation in the year's work.

Respectfully submitted,

RANDOLPH BAINBRIDGE,

Commissioner of Public Works.

Thomas Crane Public Library

REPORT OF THE TRUSTEES

To His Honor the Mayor of the City of Quincy:—

The Trustees of the Thomas Crane Public Library submit herewith their annual report, it being the 40th of the whole series since the establishment of the Library.

The object of the Trustees of the Public Library is to place as many good books in the hands of as many people as possible. This is entirely a matter of finance. The increase of appropriation last year was applied to the establishment of the West Quincy reading room. The result proved the wisdom of the course. There has been a circulation of between 8,000 and 9,000 there in six months. This is certainly gratifying. But it is nothing more than can be done in other outlying sections of the city.—Atlantic, Wollaston, Quincy Point. Also there might be a large circulation at Hough's Neck, especially in the summer. Of course this involves time and labor, how much only the workers at the Central library know. It has become absolutely necessary to establish a Branch reading room in Atlantic. There is a large reading public there and it is practically impossible for them to come to the Central library for their books.

Granted sufficient funds it is not at all unlikely that we may attain a circulation of 150,000. The population of the city is increasing and the increase over last year in circulation, nearly 14,000, shows the demand. The fact is evident that the day of small things is over and done with.

For the operation of the Library in detail and statistics connected therewith the Trustees can do nothing better than to refer to the full and complete report of the Librarian.

All of which is very respectfully submitted,

For the Trustees,

E. C. BUTLER,

Chairman,

GEORGE W. MORTON,

Treasurer.

REPORT OF THE LIBRARIAN

QUINCY, MASS., January 2, 1911.

To the Trustees of the Thomas Crane Public Library:—

As one indication of the growing importance and usefulness of our public library, the returns show a total circulation of 95,231 during the year just ended. This is the largest issue by upwards of 5,700 of any year since the establishment of the library, and is an increase of 13,891 over the circulation in 1909.

The amount of fiction borrowed from the Main hall, in an increased circulation there of 4,213 over the previous year, is less by about one and one-half per cent. This is nearly balanced by the larger number of periodicals borrowed, other non-fiction remaining about the same. An interesting comparison of the character of this periodical circulation with that of 1909 shows general periodicals, which include all the lighter ones read perhaps simply for the stories, to have decreased above 4 per cent in their proportion to the whole number issued this year.

It has been evident also that the reading room use of periodicals, at least, is much larger although no records are kept of attendance or the number of readers. This is no doubt owing to the purchase early in the year of another copy of many of the popular magazines, so that the current number may now be found in the reading room as well as had for circulation.

By far the most important work of the year has been the widening of the library's influence by the opening of its first branch reading room. Through the interest of the Mayor and the generosity of the City Council in its appropriation, this was made possible; and in West Quincy, the ward farthest

from the centre without special library facilities of any kind, a long cherished hope was realized on July 5. An attendance averaging 86 per day during the hot month of July witnesses to the appreciation of the reading room at the start, and a circulation of 8,068 with an average daily attendance of 93 for the six months, shows that that appreciation has continued.

The reading room opened with a deposit of 375 volumes, later increased to 500, a subscription list of 12 magazines, a Boston daily paper, and two Quincy daily papers. A set of encyclopedias, a dictionary, atlas, gazetteer, and other reference books have since been placed here and a portrait in black and white of Thomas Crane has been hung upon the walls. A complete set of St. Nicholas bound by our own binder has been purchased for the room, and 83 books have been given by Miss Wainwright, thus making a start toward its own permanent collection. The books on deposit have been exchanged monthly, upwards of 50 upon an average, and besides the above advantages of the reading room itself with its frequent fresh supplies from the Central library, there is a delivery three times a week from Crane Memorial Hall accommodating those at West Quincy who send requests for books. One may also step in to the Central library and have his book, borrowed at the West Quincy reading room renewed (if renewable), or he may receive the same accommodation at West Quincy, and he may return a book, borrowed at either place, to the other.

In her report to the librarian of her work in West Quincy Miss Wainwright says: "The borrowers range in years from nine to ninety, and include Italians, French, Germans, Swedes and Finns. Every month sees more children registered from the Willard and Gridley Bryant schools. There are a number of young men who find the reading room helpful, consulting the works of reference and sending to the Central library for books on various subjects. It has been interesting to determine whether girls or boys predominate among the borrowers, but the balance seems to be almost equal. Among the adults also the same figures prevail, with possibly a few more women than men."

The expenses somewhat in detail of this, our first branch reading room, should be interesting:—

Equipment

Fitting up of room (shelving, gas, screens, awnings, signs, etc.)	\$196.62	
Furniture, (desk, tables, chairs, clock, curtains, leatheroid cases, etc.) . .	199.50	
Desk supplies, (charging tray, dating stamps, stock, etc.)	31.56	
Periodicals and Printing, (temporary binders, record charts, etc.)	91.04	
Sundries, (expressing, car-fares, janitor's supplies, etc.)	42.73	
		<hr/>
		\$561.45

Maintenance for 6 months

Rent and care of room, salary, fuel and lighting, delivery of books, printing, postage, etc.	\$461.74

This amount does not include the cost of the 25 reference books taken from the Central library's collection, nor the money expended for a large number of duplicates of popular books, both fiction and non-fiction, the necessary upbuilding of the resources of the centre of the system to supply the demands of the new member upon it.

We should buy some books in foreign languages especially for this section's patrons, a French dictionary and possibly an Italian one. The Italian newspaper sent from the Central library is much appreciated.

The whole number of borrowers at the reading room to date is 711, including 183 formerly using the Central library who have taken advantage of the nearer accommodation.

Another wide field for the extension of the library's activities is the work with the schools. Copies of the very excellent graded and annotated classified catalogue, issued by the Carnegie Library of Pittsburgh, Penn., have been purchased and placed in the several grammar schools. The books in that catalogue which our library did not have were bought, 583 volumes including some duplicates. Additional copies of most of these should be bought the coming year as well as of many other books, for we have as yet but a meagre collection to satisfy what we certainly hope will now be a growing demand. Of the 631 volumes sent out to the schools no further statistics have been kept, otherwise these figures would no doubt have added three times their number to our circulation.

Of the 2,577 volumes added by purchase (exclusive of books replaced), as against 880 volumes in 1909, 2,549 were bought from the city appropriation, and 28 from the income of the Cotton Center Johnson fund. Fewer books were replaced this year than last, but 995 duplicates were purchased on account of the schools and the West Quincy reading room, as against 107 in 1909. Leaving those out of the count, 1,582 new books were added in 1910, and 773 in 1909. A beginning was made by the purchase of 37 books in Italian, and 9 in the French language were added to those already in the library. There is a call for more books in both languages.

The following shows the character of the additions to the library, 2,577 of these being acquired by purchase, 217 by gift and 106 by binding periodicals.

General Works	19

The following tours were added to the collection of stereographs:—Switzerland, France, Germany, Norway, England, Egypt with a guide book and maps, Washington with guide book, Real children, with book describing visits to their countries. The views are enjoyed in the reading room, loaned for home use, and their welcome amply justifies the purchase of others.

The record of the actual users of the library soon becomes a very imperfect one through the failure to report change of address and through registrations made void by removal from the city or by death. Frequent re-registration entails much labor. Early in the year all the registrations since the reopening of the library in June, 1908, were examined, and every person not known by some member of the staff to be using the library was carefully looked up.

By this method, 1,016 adult registrations and 571 juvenile registrations were cancelled Dec. 31. Adding to these, 143 cancelled registrations reported at the Central library and 7 at the West Quincy reading room, the total number cancelled was 1,737. This thorough revision of the registration amounted practically to a re-registration without trouble to the public, got rid of all the "dead wood," so to speak, leaving us with a real "live" registration at this date. This large number of cancelled registrations explains the reason that the whole number of borrowers at the end of 1910 shows so little increase over the whole number reported Dec. 31, 1909.

Adding to the 876 new borrowers at the main hall, 144 who have re-registered from the children's room, we have a total of 1,020 registered at the main desk during the year.

The extra work at the Central library incident to the opening of the branch reading room affected all departments. Much time had to be spent in preparatory work, planning, looking into the best systems of keeping records, making out charts, etc., the latter largely done in the catalogue department. From the first a separate account of all expenses has been kept monthly. Then came the work of adjustment between the

Central library and the reading room, the getting things in running order, frequent changes of deposits, and the sending and receiving of the request books, 803 having been charged at the Central library to individual borrowers at the reading room during the six months.

The experiment has been tried of rearranging the fiction in the children's room alphabetically by author and titles rather than by numbers. The labels were removed, backs of books sometimes repaired, at any rate shellacked, in many cases re-lettered. Even with its drawbacks it seems a more intelligent way of handling the books and is voted a success. The circulation here has exceeded that of 1909 by 999. Only 12 books are missing at the last shelf list reading in a year's circulation of 22,207 from this room.

The amount paid for binding in 1910 has been \$526.35 as against \$711.45 in 1909, and \$869.50 in 1908; and this notwithstanding the large increase in the use of our books. This is due to the fact that, owing to our own mending here and care of them, they are in better condition to bind and therefore last longer when rebound. More books have been repaired here and fewer by the binder. As the publishers' bindings are so poor we purchased 215 volumes in sheets and sent them to our binder. This secured for us at the start a much more durable quality of binding, and the advantage that the books thus bound did not have to be withdrawn from circulation just when they were most wanted. We have also purchased a mending kit by the use of which we expect to do even more repairing of our own books. This, while it costs an assistant's time and money, has the distinct advantage, if successful, of not withdrawing popular books from circulation for weeks.

We have received the usual number of exhibits from the Library Art Club, 11 books have been available to our readers through the Inter-library loan department of the Boston Public Library, and through the State Federation of Women's Clubs we had from May 7 to 28 the Travelling Health library of 39 books, 48 pamphlets and 40 pictures. We have given

many old books and newspapers to the Salvation Army and a few for use in the Cheerful Letter work.

In the resignation of Mr. Newcomb the library loses the janitor who has filled that position for over 30 years. To his faithful service, in which he has been ably assisted by his daughter, is due the well kept appearance of the beautiful Crane Memorial Hall.

Atlantic having been the first section to be provided with a weekly delivery of books, which Mr. Thomas Gurney has kindly received since 1881, it seems that it should be next in line for larger accommodations from the library. And I certainly hope we shall be fortunate enough to be able to start our second branch reading room in that ward the coming year. Also the request of the Boston Gear Works for the library to purchase some books especially suitable to the needs of their workmen and allow the same to be placed on deposit there should not be disregarded. Indeed I wish that every industry in the city would express the same desire and that the supply might be equal to the demand, for it is in such ways that the library comes close to the business or working man so that he feels it to be not a luxury, not only a place to supply women with the latest novel, but a necessity for his own growth and advancement, and the "people's university."

It is nearly three years since the books were cleaned by the vacuum process, upon their removal to the new stack room. That method having been successful, I would suggest the purchase of some one of the many portable pneumatic cleaning machines upon the market, the use of which is an up-to-date way of avoiding the accumulation of dust.

In closing my report for 1910, I wish to thank the staff to whose willing and hearty co-operation is due in large measure any success which we may have attained while holding before us a high ideal of service.

Respectfully submitted,

ALICE G. WHITE,

Librarian.

Report of the School Committee

To the Citizens of Quincy:

Your School Committee respectfully submits the following report. The enviable standing of the school system of Quincy, which has placed her in the front ranks of education, has been maintained during the past year. Book knowledge has not alone been taught, but in addition, the fundamentals of life, power and efficiency. To mould and shape the character of the coming generation should ever be a prominent factor of education.

Your Committee fully realizes that it made no mistake in the selection of Albert L. Barbour for Superintendent. At his suggestion many valuable changes and additions have been made to our school system. His painstaking supervision, earnestness, and thorough executive ability are greatly appreciated by the Committee and the character of the schools bears witness to his thorough and conscientious work for the city.

The Committee wishes to express here its appreciation of the teaching force, which so faithfully labors for the good of our children. Wages of almost every vocation have increased in the past few years, while teachers' salaries have remained unchanged. If due consideration be given to the nature of their work, which is of immeasurable value to the city, and to the excellence of the services rendered by them in their work, it cannot be denied that they are not receiving, under the present

salaries paid them, a just return for their labor. If we consider further the increased cost of living, and the various other necessary expenses incidental to the advances made along educational lines, it must be admitted that the teachers of the Quincy schools cannot do more than barely earn a living. The Committee, therefore, recommends an increase in their salaries to equal at least, that paid in neighboring cities.

The High School, under the able management of Head Master James D. Howlett, who was elected to his position one year ago, is in a flourishing condition. Seven hundred seventy-one pupils are enrolled. The curriculum has been broadened so that it offers diverse courses to satisfy the needs and interests peculiar to the various pupils in their preparation for future work.

To the great satisfaction of parents a lunch counter has been installed, where at a nominal cost, good wholesome food is provided. It is practically self-supporting and is highly satisfactory to all. Domestic science in its various branches is being adequately provided for. Such an important addition to the high school course cannot but meet the hearty approval of all.

We wish to emphasize the importance of the department of manual training. Only within the past year has any considerable work been done in this line. At the high school building a promising beginning has been made. Here boys of the high school and those of the eighth grade in the grammar schools may in limited sessions receive instruction. This instruction is greatly restricted by lack of room and proper lathes, tools, benches, etc., which are absolute essentials for successful teaching. Other cities have seen the importance of this branch of education and have amply provided for it and Quincy certainly should do likewise.

If, with satisfaction to all interested parties, Adams Academy could become a part of our school system and be recognized in some way in the name of our high school, there would be ample room and means for the maintenance both of a strong classical department and a practical training school

which your Committee feels would satisfy long felt want in this city. It is urgently urged and recommended that this union of forces be brought about.

The evening schools have been most satisfactory. At the high school seven separate rooms have been used for various kinds of teaching. The Committee thinks the results obtained justify urging that a regularly organized evening school for advanced pupils be made distinctly a part of our school system. The attendance at the other evening schools proves their success.

The present congestion at the Coddington School should be relieved by the much needed opening of the Atherton Hough School. This new building will be nearly filled when it is opened. The proposed new buildings at Wollaston and Montclair will supply a long and greatly felt want in these sections. The rapid growth of Squantum and the increasing number of families settling in Atlantic as a result of new industries starting at Neponset will soon demand increased capacity at the Quincy School. Ward Two with the Fore River Shipbuilding Company and other industries about to locate there will soon demand a new school building situated nearer the center of this district. These demands the city must soon meet and we earnestly ask that early attention be directed to these sections.

The telephones, which have been installed in each of the schools, have resulted in the saving of much valuable time which formerly was lost in travel from one building to another and which is now better utilized in the direct work of the schools.

The wisdom of establishing among the scholars of the grammar schools a system for the saving of pocket money has been fully demonstrated. During the past year, as a result, from eight to nine hundred dollars have been saved each month by the pupils and placed on deposit to their credit in the Quincy Savings Bank. In this way, thrift, a great essential to success in life, is taught our children. We strongly advise the continuance of this system.

The Committee recommends that the Board of Health institute a thorough-physical examination of *every child* at the beginning of each school year and that proper compensation be paid the school physicians for this extra work.

We condemn the drinking fountains found in our school buildings as unsanitary and of unsatisfactory type and we recommend the installation of some approved type of drinking fountain in each of our schools.

The wisdom of having adequate playgrounds surrounding each of our grammar schools cannot be doubted, and we recommend that these be provided wherever it is possible. We therefore in this connection advise and urge the purchase, as soon as possible, of the Arnold lot, adjoining the Coddington School, and also of the lot adjoining the Massachusetts Fields School.

The present prosperous condition of our schools, is a testimony of the good will, liberal and hearty support and keen interest of the citizens of Quincy in past years, and that she has taken such a prominent position in education should be the just cause of much pride to her citizens. The Committee feels certain that when future demands are made on them the same promptness and loyalty will be manifest as in past years.

On April 7, 1910, Mr. Dexter E. Wadsworth, who was serving his second term as a member of this Committee and who had rendered the city faithful and very efficient service in this department and in other ways, passed from this life.

At a joint meeting of the School Committee and the City Council held May 16, 1910, Mr. John D. Mackay was chosen a member of this Committee to fill the vacancy caused by the death of Mr. Wadsworth.

The School Committee at a meeting held April 26, 1910, adopted and placed on record the following resolutions:—

In Memoriam

IN MEMORY OF MR. DEXTER E. WADSWORTH

The members of the School Committee wish to put on record their high appreciation of Mr. Dexter E. Wadsworth as a member and as a man.

As a member of the committee he was always prompt and attentive to all its duties—earnest and careful in all his deliberations. As a man he was a good citizen—a true and loyal friend—thoughtful and helpful to others—giving always the best that was in him to whatever he undertook.

The schools and the city are distinctly poorer from the loss of a character of such strength and promise.

Our most sincere sympathy is extended to the wife and mother at this time of their great affliction.

Resolved: That this memorial be spread upon the records of the School Committee and a copy be sent to the family of Mr. Wadsworth.

John L. Miller, Chairman.
Arthur W. Newcomb,

James F. Burke,
Herbert S. Barker,
Albert L. Barbour, Secretary,

Quincy, Massachusetts, April 26, 1910.

The foregoing report presented by a special committee, consisting of Dr. Edward H. Bushnell, Mr. John J. O'Hara and Mr. Herbert S. Barker was adopted as the annual report of the School Committee of 1910.

ALBERT L. BARBOUR,

Secretary.

Report of the Superintendent

To the School Committee of Quincy :

Herewith I submit my second annual report as Superintendent of public schools, which is the thirty-sixth in the series of such reports and the sixty-first of the printed reports of the School Committee of Quincy.

School Efficiency

The success of any business or process may best be measured by its product. We are accustomed to take careful account of the output, the waste and the costs of production in nearly all fields of human industry. In some fields it is possible to do this with almost mathematical exactness; in almost all is it possible to search deeply enough to determine whether or not there is progress and by what means that progress may be made continuous and widely inclusive. For instance, in the minds of those concerned in the education of youth and anxiously seeking successful results, such questions are apt to arise as the following: How great a percentage of pupils entering the first grade are continuing to the final grade? How many reach the final grade without repetition of the work of one or more years? What is the cause of the repetition of work or the elimination of pupils from school in the first eight grades? What is the record of success made by pupils after entrance to the high school? How many pupils leave high school on account of failure to do the work or are obliged to repeat work? Of the number who are carried through to high school graduation

how many have any definite aim or are prepared in any special direction for a productive life work? Such questions, of course, are mainly quantitative; yet it will be generally agreed that they are entirely pertinent and highly important. Some of them can be answered exactly in numbers and percentages; others can be answered only in a general way and without any assurance of certainty, since inferences and not exact knowledge must so frequently be used as the basis in determining conclusions.

The growth of the school system on the side of efficiency will be influenced very greatly by the fearlessness and intelligence with which we take such questions into account, and a consideration and a comparison of our results from year to year even if incomplete cannot fail to be of great value. For instance, the graduating class last June from the combined grammar schools of the city numbered 418; in September 1902, the first grades of the combined schools numbered 869, over 200 of whom had entered school for the first time the previous year. These two statements in a general way, indicate some elimination from school and a considerable amount of retardation as the pupils pass from grade to grade. A study however of the history of a class, year by year, from its entrance to school as a first grade until its graduation as an eighth grade gives us information as to the point in the school course where pupils find progress most difficult, and where they most commonly leave school. An examination moreover of the individual instances of pupils leaving school to determine actual causes, will give information which if properly interpreted and handled should be of immense value in our efforts to make the school system more efficient. The same statement would be true as to a study of the individual instances of retardation of school progress. In our most recent graduating class cited above, 3 spent 5 years in completing the course; 1 spent 6 years; 11 spent 7 years; 193 spent 8 years; 155 spent 9 years; 37 spent 10 years; 17 spent 11 years; 1 spent 12 years. In other words, 210 or a bare majority required more than 8 years to complete the course. A study of a series of classes from year to year will enable us to determine whether

the number of pupils who meet retardation at some point or other in their school course is being reduced or not, and if this study is conducted in such a way that each pupil becomes a subject of thought, requiring specific reasons for individual failures, we can undoubtedly reduce to an appreciable degree the very considerable amount of waste energy, which goes on from year to year, and which is a characteristic of all school systems. A careful attention directed toward individual failures actual and threatened in the many school rooms of the city with an analysis of causes will inevitably arouse equal interest in applying such remedies and preventives as may be brought to bear to ward the failures off, so that as the individual is studied more closely profit should accrue both to the school system and to the child.

Especially in the high school where most retardation and waste energy takes place, a study of individual failures and of pupils leaving school will do much to inform us whether the school is gaining in power to achieve results; and will indicate how the work of the school may be modified or its scope broadened to make the widest possible appeal to adolescent youth.

In a word, the school department should keep a record of its successes and its failures, as far as it is able to use any standard as a measure. If it has material each year with which it achieves no measurable or worthy results, causes must be studied and these as found or inferred should be recorded whether to the credit of the schools or not. In an extended and country-wide study which was made under the direction of the Russell Sage Foundation along these especial lines, the schools of this city hold exceptionally high rank in efficiency attained. Even so, the improvement which may easily be made by facing the fact that this retardation and elimination is constantly going on, by going well below the surface to search for individual causes and to apply remedies, and by directing to the study of this question the intelligent attention of the entire school force, is so great and of such vast worth that it is the most immediate duty of the school department, and is already being undertaken.

Enough has been said to indicate the great amount of school waste. The great and general contributing causes to this waste are also quite well known. Physical inefficiency is one very large factor, probably the largest. The system of medical inspection by physicians, and of examination of eyesight and hearing by the teachers, incomplete though it is, has thrown a new light on school work. We find, year after year, that the list of dull or slow or non-promoted pupils corresponds to a startling degree with the list of pupils who are deficient in eyesight or hearing, who have adenoids or enlarged tonsils or who give various evidence of mal-nutrition. A more thorough medical inspection, one that would include every child at regular intervals, not merely the selected cases, were it to be accompanied by adequate remedial work, undoubtedly would more than repay its added cost by preventing a large amount of suffering, discomfort and misspent energy.

Another factor contributing heavily to school waste is the inability of the school department with its limited resources to give sufficient attention to the individual child. With a high ratio of pupils per teacher, the child needing special attention is apt not to receive it unless there be assistant teachers who will give this individual help. Whenever such assistance is at hand, either for pupils who have been doing unsatisfactory work or for those who have been promoted conditionally, it usually yields very satisfactory results and averts many threatened failures. More work of this nature would bring increased efficiency.

Still another factor that tends to waste energy in many instances is the non-adaptation of the course of study to many children who may be of average or less than average ability. If a very large number of children require more than eight years to complete the grammar school course, there is a natural presumption that the course of study is not adapted to the maturity of the children. Especially does this seem true when the average age of the different grades is comparatively low. As the amount and kind of work required in preparation for high school is generally standardized by custom and public demands, the non-fitting of the course of study to the pupils must in our

case, so far as it exists, be caused by a lack of maturity on the part of the children rather than by the undue demands of the course, and this will in time undoubtedly be remedied, as a result of the recent action of the School Committee in increasing the age required for admission to school from five to six years.

Change in School Age

A very important rule enacted by the School Committee early in the past year was that which required that all children entering school, beginning September, 1910, should have attained the age of six years, and which further provided for two entering classes each year. This change in the age required for entrance to school is one which has been under consideration in this city and has been discussed for some years and it is in line with the most intelligent practice. Dr. John T. Prince in a report to the State Board of Education in 1909 said, "There are two good reasons for not favoring an eight years' course to be begun with children five years of age. In the first place such a plan could not be carried through thoroughly without over-taxing the pupils. This would be especially true if the present length of school day is maintained and if as is likely more industrial work is demanded. In the second place the formal work generally required in reading, writing and arithmetic is entirely too difficult for children of five and the transition at that age too sudden from the freedom of the home to the formal work of the school." This statement puts the case exactly and is corroborated by the experience of the teachers of this city.

A careful study of the statistics of any class as it has progressed through the school system shows that there are two points in the school course where the amount of retardation has been unduly large; at the end of the first year in the elementary school and at the end of the first year in the high school. The one reason almost universally given by teachers who have to do with these cases of failures is lack of maturity sufficient to grasp the work assigned. The child of five is not a proper subject for class room instruction as it is now generally given and certainly should not be subjected to constraint upon his

freedom for even the two hours which the school room schedule now requires. The six year standard for admission will bring more maturity to our entering classes and will unquestionably decrease the number of failures both in the first and in succeeding years in the grammar school. Likewise as the average age of the freshman class in the high school will be slightly increased, the amount of failure at that point will tend to decrease. The school system will consequently profit in two ways. There will be an economic saving, in that a great amount of repetition of work will be avoided and further, the moral effect which will come from the avoidance of failure is of almost incalculable value.

Beginning with the present year, moreover, new first grade classes are to be formed semi-annually, instead of annually as heretofore; in September and in the latter part of January. As this plan works out, with a semi-annual promotion, there will be sixteen grades in the elementary schools, each a half-year from that next higher or lower. Continuing this plan into the high school, there will be ultimately semi-annual admission to and graduation from that school. With twice as many grades in the school course as there now are and with the shorter intervals between them, a great deal of the present rigidity of gradation will be overcome and with an adequate corps of assistants many of the machine-like characteristics of the present day school system can be avoided. It will be easier with this plan for the bright pupils to save time in passing through the schools, as extra promotions may be made much more frequently. The children who fail of promotion will be most benefited, however, since the loss in standing in such cases will be but half a year instead of a full year, which will make the disappointment less keen while the work of repetition will be easier because of its comparative freshness.

This plan of promotion is not new and is by no means ideal, but properly administered and supplemented by a purpose and ability to get at the individual child, it will prove vastly more efficient than the system of annual promotion. Semi-annual promotion of course, does not involve a semi-annual change of teachers as the child in every instance will con-

tinue with one teacher for a full year. The most noticeable result of the change, so far as the administration of the school is concerned will be that each room will have two small grades instead of one large grade as at present, a change which has many advantages and few disadvantages.

Parents' and Teachers' Associations

There is one thought and it is by no means a new one which needs to be brought frequently to the attention of the parents in any community:—that the education of their children is a continuous and a very complex process, one for which the responsibility is divided, and cannot be placed solely on any one particular agent. Our schools represent but one factor in this process. Education begins at birth and proceeds at a very rapid rate for six years before the schools have any contact whatever with the child. Even after school life has begun, the school share in this educational process covers only about twenty per cent of the child's waking hours. So that the portion of the child's life which he spends outside the school room is of the greatest interest and should be of the most serious concern both to teachers and parents. In any undertaking, to get the most productive results, there is required a co-operation of contributing agencies, a study and discussion of causes and effects, as they appear and an attempt at the elimination or reduction of forces or elements which would tend to produce waste or to neutralize in any way the constructive efforts. So the highest efficiency in education, whether it be of the individual or the mass will come where this same union of forces is secured. In other words, to get the best results in child training it is necessary to bring together the parents and the teachers for harmonious action. If the parents and the teachers are consciously at one in their efforts the results will be far better than would be the case were there no co-operation or attempt at united action.

In two of the school districts of the city a great deal is being done to secure intelligent educational co-operation

through organized associations of parents and teachers which meet at regular intervals in the school buildings for the purpose of discussing educational problems, to get in touch with the daily work of the school and for social intercourse and interchange of thought between teachers and parents. The value resulting from the work of such associations can hardly be questioned or estimated. The schools and the teachers are brought more deeply into the life of the community and opportunity is afforded for a really effective co-operation against those agencies which (by their very nature) antagonize the work of the school and which must constantly be fought. The organization of more of these associations in connection with some of our other schools is now under consideration and if such associations can be successfully administered they will do much for the spirit of the school and the good of the individual child. The schools are a public property, a community undertaking and the community sympathy which comes from first hand acquaintance would be of great profit in their operation.

Vocational Problems

Probably no educational theme is receiving more thought or discussion at the present time than that of educating the young more directly and in a more purposeful way for that period when they must earn their own living. There is a feeling wide-spread among thinking people that a child should have opportunities for training along other than the traditional academic lines; that instead of having a single educational mould and conforming the children in mass to this mould, there should be several fields of preparation with an intelligent opportunity for choice. The demand seems to be insistent that a child who prefers to work with his hands and who perhaps because of distaste for the school curriculum as generally provided, is determined to do such work, shall have intelligent direction to prepare him for his future vocation. Another side of the subject has to do with the direction of the child in the choice of his future work; in other words, vocational guidance.

Both phases of education are highly important and their correct solution will mean much to the youth of present and future generations. Both phases, moreover, are highly complex and involved, with substantial agreement thus far among educators and intelligent thinking people, only as to the general and underlying conditions and with a very wide variance of opinion or even disagreement as to the procedure which is best calculated to solve the problems correctly and with complete satisfaction. There is undoubtedly, a great need for the wise guidance of the young in their choice of vocation and yet the dangers of unwise or ill-advised guidance are so great and the possibility of thwarting an ambition that is but nascent or slow in maturing and expressing itself is so likely that the person who would undertake this work needs to be of the broadest and most tactful character. Undoubtedly the greatest opportunity for work in the way of direct guidance will be in acquainting the young person who is about to make his venture in the work-a-day world with the nature of the processes, products and opportunities in the various great vocational lines, leading him at the same time to make an inventory for himself of his own natural capacities and abilities. With these two elements carefully considered, the child, will make his choice with far greater intelligence than he would if unaided.

Moreover, on the training side which will precede vocational selection, there is substantial agreement as to the desirability of broader opportunities in the schools, but there can be no agreement in practice, as the problem of each community will be individual to itself. But whatever the community may be and no matter what its industries are the demand for a sensible training of the muscles in skill and versatility is most imperative and should precede any specialized training for particular industries. First of all, every child should receive that education which training the hand will bring, and this will be the foundation upon which the structure of industrial training should be erected. Then at whatever point in the school course attempts at definite industrial education are made and with whatever industries there may be an alliance,

there will be a body of pupils already equipped with properly developed nerve centers and with hands trained to a deftness suitable and necessary to manual processes.

The development of the school work in this city in the early grades on the manual side is well under way and will gradually be broadened and extended as experience points out the path. The problems of industrial education are now pressing for our consideration but the avenues of approach do not yet make themselves clear. It needs to be stated frankly that the undertaking will be one which will involve considerable expense and one in which mistakes cannot be afforded as to the method by which the work is undertaken. As the movement gathers headway throughout the country, we shall be enabled to profit by the experience of other communities and to work out for our own school system that plan of training along this line which will meet the needs of our community most fully.

Teachers' Salaries

The subject of teachers' salaries is one which is almost always pertinent for discussion for the reason that teachers are almost always underpaid.

A request has recently come from the teaching corps for an increase of salaries, a request which can easily be sustained by a comparison of the salary scale of this city with that of other cities, as well as by sound business argument.

In the matter of establishing a schedule of teachers' salaries sentiment does not need to be invoked at all; it is purely a business proposition. If a number of business or manufacturing plants engaged in exactly the same lines are maintained side by side and one pays a distinctly lower wage scale than the rest, the outcome is easily foretold. Few people would be venturesome enough to make such an experiment with the inevitable staring them in the face. What is true in business or manufacturing processes is equally true in educational processes but the result of making such an attempt would be far more disastrous because the

material of our output is far more precious. Other things being equal, the best teachers will produce the best results and it is true of teachers as of workers in all other lines, that the best teachers will usually be found where the best salaries are paid, though of course, there will be many who because of home ties or long service do not come directly within the class who are looking forward to financial advancement. There is no question that the sentiment of this city is for all that is best in educational matters; its honorable history of leadership is too long and too well known to its citizens for the sentiment to be otherwise, but it needs to be stated frankly and often that the best teachers, good teachers, in fact, can only be secured and retained when a municipality is willing to pay the price and that price can never be less than the price paid by the average city. Of course, the only criterion in selecting teachers is that they shall be capable and be the best that can be obtained by the salary schedule at the disposal of the school department. Merit and merit alone, disregarding absolutely any other consideration, is the sole standard to be considered in the appointment of teachers, and the standard of merit will as a general principle vary directly with the standard of the salary scale. For that reason the salary schedule paid the teachers of this city should never be allowed to fall below that of sister cities in like circumstances, but should be kept at all times at a point where the schools of this city may not be placed at an undue disadvantage.

The High School

In line with the recommendations made last year as to the work of the high school, a new course of study was arranged and carried into operation at the beginning of the fall term and this course of study is printed in the appendix of this report. How this course of study is working out is best shown in the report of the Head Master of the school which accompanies this report. It may be said however that the opportunities for manual work which the school now affords both to girls and boys have added to a marked degree to its general

efficiency, affording interesting lines of work to many pupils whom previously we have been unable to reach. The greatest need of the school in its development at the present time is in the way of adequate equipment and resources to develop the manual work to a point that will be really effective. Negotiations are under way toward uniting Adams Academy property and fund with the resources that the city at present possesses. It is most desirable for the interests of our young people that such a union of forces be brought about. The city would then be enabled to maintain a classical department of distinctive excellence, and to develop as well a technical or industrial training school, which would offer the broadest possible appeal to the students.

A sufficient teaching corps is also needed so that ample time may be provided for individual work with pupils. Our high school programme is now arranged on the basis of a seven period day. It is desirable that the day be made one of six periods and that each teacher have time during the day for individual assistance. This can only be done by increasing the number of teachers, but it would be an improvement decidedly worth while.

As successor to Mr. Leslie L. Cleveland, who resigned the head mastership of the school, January 1, 1910, Mr. James D. Howlett, principal of the High School at Plymouth, Mass., was appointed and he assumed the position in February. Mr. Howlett was already favorably known to this city from a short but successful term of office as submaster of the school in previous years, and he came back to Quincy after several years of efficient and progressive service as master in two other high schools. His administration has been marked thus far by excellent management, a fine spirit of co-operation in the teaching corps, and a school atmosphere of the most wholesome sort. The school has grown both in scholarship and in self-control through his efforts. His report which follows is worthy of careful attention:

Report of High School

To Mr. Albert L. Barbour, Superintendent of Schools:

I have the following report to make on the work of the High School, for the year now closing:

The duties of Head Master were transferred to me on the last day of January, 1910. The school year was then well on its way. I am deeply grateful, and I take this opportunity of recording my gratitude, to the former Head Master, Mr. Cleveland, for very many courtesies shown me; and particularly for the pains which he took to transfer to me, not merely the duties and responsibilities of the office, but with these the loyal following on the part of teachers and pupils which his superior leadership and successful administration had won for him.

Your report of last year recommended, among other things, a correlation of work in the departments of drawing and manual training and an extension of the industrial courses of the school for both girls and boys. It is a pleasure to be able to report the adoption of those recommendations, and some splendid results already following therefrom. Drawing and manual training have been made co-ordinate and closely correlated branches of the work of one department, a department of manual arts. Pupils who take manual training are now required to take a corresponding number of exercises in mechanical drawing. The vital thing about this, however, is not that the exercises in the two subjects correspond in number, but that there is now the necessary correspondence in content and in design, to make these two subjects mutually helpful the one to the other, and each subject doubly helpful and interesting to the pupil. A similar correlation of courses is going into effect, as fast as it can be brought about, between freehand drawing and the work in the departments of manual and household arts.

There has been a very material increase in the amount of work offered in mechanical drawing and manual training. It had been possible, previously, for pupils as a rule to take but

two periods of work per week in each of these subjects, and thus to gain in all only two credits a year toward a diploma. Pupils are now offered five periods of work per week, one period each day in mechanical drawing, and the same in manual training. The diploma credits are three a year in each subject, or six in all for the two subjects taken together. Coincident with this increase in the amount of work offered in these subjects is the very marked increase in the number of pupils choosing the subjects especially the freehand and mechanical drawing. This striking increase in the number of pupils is shown by the following figures:

	1909	1910
Number of pupils in freehand drawing	79	172
Number of pupils in mechanical drawing	79	202

Whatever else these figures may mean, they appear to indicate that these subjects as now presented are proving as popular as they are practical.

In September of this year a course in sewing and dress-making was introduced. This is a notable addition to the curriculum of the school. It affords the girls the same opportunities for training along industrial lines that manual training was already affording the boys. The course is new, and may be changed from time to time, to meet the specific needs of the pupils; but this is a brief outline of the work as now planned:

FIRST YEAR

Review of stitches with samples illustrating their uses.

Construction of seams.

Use of sewing machine.

Study of cotton: growth; manufacture; cost; etc.

Terms: warp; woof; bias; etc.

Use of patterns.

Cutting and making simple articles, such as sewing bags, aprons, and the like.

SECOND YEAR

Continuation of the work of the first year, with special reference to design, use of laces and embroideries, study of linen, etc.

THIRD YEAR

Draughting, with cutting and making of garments from patterns draughted.

FOURTH YEAR

Rapid review of work of preceding years.

Millinery and raffia work.

Forty-eight girls from the incoming class in September chose sewing and dressmaking as one of their studies, the present year. The enthusiasm these pupils have shown for the work, and the highly gratifying results already in sight assure the success of the course, and make certain the need of more room and a larger equipment for this department in the immediate future.

In speaking of what the school has done for its girls mention ought to be made of one other advantage accruing to them. They have been provided with a woman instructor in physical training. This woman talented as an instructor in this and other high school subjects as well, has been made a regular teacher, and consequently is within easy reach for consultation by the pupils at all times. She has charge of the girls' classes and games in the gymnasium, and exercises a general and helpful supervision over the girls of the school. She thus supplements and rounds out, as only such a woman can, the admirable work that Dr. Smith as Director of physical training, is doing for all the pupils of the city.

The High School, in response to a long felt and rather urgent need, has at last opened a lunch room. We are not saying much about it as yet, because very few school lunch rooms are securely on the side of business success. They appear to be among the most uncertain of business ventures. Many of them survive, not by virtue of business success, but through

some sort of saving connection with the city treasury, or the treasury of some charitably disposed organization. It may be said of this one, however, that so far it has been successful beyond the expectations of its best friends. It has been able to provide wholesome and well cooked food, at a small cost; and at the same time to pay its own bills, and accumulate a small balance in its treasury, a balance against the lean days that inevitably come later in the year. The food which the lunch room provides is purchased, prepared, and served by and in connection with the domestic science department. This is a rather unique arrangement in a school as large as this, and may in some measure account for the apparent success of the enterprise. To Miss Ames, the eminently efficient head of this department, and to the capable girls who volunteer to assist her in the serving, and perhaps it ought to be said, to the pupils who have been constant and considerate in their patronage, great credit is due for the success thus far achieved.

Reference has been made to a few successes. Something ought to be said concerning at least one failure—a failure, not confined or especially peculiar to Quincy, but common in some degree to all high schools—the failure to carry a fair percentage of pupils, not to say to graduation, but even to a satisfactory completion of one year's work. Most of these failures come, as is generally known, in the first year of the high school. It has been admitted by masters of large schools that these failures in some cases run as high as fifty per cent of the entering class. That is to say, half the pupils who entered in the given case failed in one or more subjects during the first year. This, let it be understood, does not mean that all these pupils failed to "pass" the first year's work, but that they failed in some portion of this work. Quincy, be it said, is not notorious, indeed all things considered is far from notorious, in this respect. Yet Quincy has had many, too many, of these failures; and against them we have resolutely set our face. With what success we shall see. Toward the close of the last school year, courses of study were carefully prepared. The Head Master personally visited every one of the eleven grammar schools of the city, placed printed copies of these courses

of study in the hands of all pupils who expected to come to the High School in September, and gave some explanation of the nature of each course and some suggestions to guide the pupils to a wise selection of studies. The pupils were then required to choose their studies under the direction and with the approval of their parents and the masters of their respective schools. The good work thus well begun in the grammar schools has been continued without any abatement of zeal in the High School. Teachers in the regular school periods, and in special afternoon sessions when necessary, have given to the utmost of their time and energy, to steady the courage of the beginner, and to draw him out to a healthy interest and a reasonable perseverance in his work. The result is that at the end of four months we are able to report less than half as many of these first year failures as it was necessary to report at the same time in the previous year. It may not be out of place here for the High School to express its appreciation of this cordial and most helpful co-operation on the part of the grammar schools, and to accord to them due credit for their large part in this highly meritorious work.

What is to be said concerning the failures that we must still report? There is little question that they are the natural result of one or more of these causes—(1) immaturity, (2) lack of home study, (3) irregularity of attendance. A very frank word ought to be spoken at this point, spoken in the interest of the pupils, and spoken in a tone that will reach and win the parents; for these causes without question are most prolific sources of high school failures wherever these failures appear, whether at the beginning, middle, or toward the close of the course. And these causes, particularly the lack of systematic home study and irregular attendance on school duties, are crying ills in not a few homes. Immaturity is as excusable on the part of any pupil as is the color of his eyes, but it is not excusable on the part of any parent, when that parent persists in pushing a pupil beyond the pace set for him by Great Nature. Lack of home study and irregularity of attendance, are not these, too, quite as often the faults of parents as of pupils? A high school presupposes the preparation of many

studies at home. It expects at least two hours a day of systematic home study, and more than this in many cases. If, therefore, the parent requires or permits a pupil to spend this time in some other way, failure is at the door. The work of a high school in kind and in amount presupposes the continuous presence of the pupil every school day and throughout every moment of the session. If, therefore, the parent, as is too frequently the case, urges as an excuse, for keeping the pupil out, or allowing him to remain out of school, a cause that would not, often could not, be urged as a reason for breaking a business or even a social engagement, again failure is on that parent's threshold. A high school is a business institution. It may be much more, but it never ought to be less than the greatest business institution in the community, for it has to do with the community's business men and business women in the making. It is in the interest of these men and women in the making that this appeal is made for a stricter adherence to the principle of unvarying regularity and punctuality in attendance, and for fidelity to every other principle that may spell success. Let parents and teachers get together in this cause—it is their cause in common, to rid the pathway of the pupil of every unnatural and unnecessary obstacle, and give to the young wayfarer not a half but a whole chance.

I wish to thank you personally, and with you the members of the School Committee, for friendly counsel and for unfailing support; I wish, also, to express a very genuine appreciation of the splendid loyalty and the faithful service of the teaching corps, and to acknowledge an indebtedness to the many parents and pupils who have contributed so generously to the making of a successful school.

Very respectfully submitted.

JAMES D. HOWLETT,

Head Master.

Quincy, December 31, 1910.

Physical Director

The physical side of our system of education has passed through another successful year and one marked by gradual extension and development. The report of the Director which accompanies this discussion will give more complete details. The corrective exercises in the last five grades of the elementary schools have been thoroughly developed and in the main, the principles are well grasped by the teachers. As these exercises persist steadily through the course, the effect in carriage and poise will become visible, and the general health effect, though difficult to measure, will be tremendous. The development has now reached a stage where we may extend the system down through the three primary grades with a corresponding and even greater benefit therefrom. Our system of plays and games for recess work has continued as during the past year with success the more marked since we have increased the element of interest and taken away those features that had not proved their worth. The boys of the upper grades have learned and are now playing the game of association football, and we hope to introduce gradually a supervised direction of some track and field sports. The grammar school base ball league, which played a series of fifty-eight games during the months of May and June on the fields of Merrymount Park, was a pronounced and encouraging success, not alone from the standpoint of clean athletics, but because of the feeling of school solidarity that was built up and encouraged, and the sentiment of pride, loyalty and social unity. The series of games was an unusually good example of clean sport; wrangling and disputes were very rare and the boys learned to be good and patient losers as well as graceful winners.

The athletic field was at all times absolutely free from any evidence of rowdyism, and the lessons of restraint and good conduct that the pupils learned on the ball field had a value that it is difficult to estimate. No doubt our inter-school athletics can be continued and extended in future years so as to get all the value that this side of education may give.

Now the logical outcome of this child activity in plays and games is that which at present lies outside the province of the school department but which it is within the power of the city to provide. That is, the time has come for the city to make adequate provision for the supervision and education of its children during the long summer vacation months on its public playgrounds. The playground movement rests upon the recognition of the fact that child training and education, as has been before said, is a continuous and never ending process; that it continues every day in the year and every waking hour of the day; and that the public school is powerless unless it is supplemented by other constructive agencies or if other agencies be present that neutralize its results. The development of the public playground system is a definite recognition of the folly of allowing children to run wild or go untrained during their idle hours, and is an attempt to provide for them conditions and places where they may play in safety. Of course for the child who has work for these vacation periods, or whose parents keep a close supervision over his time there is no necessity for this line of public activity, but the vast majority of children fall outside these two classes, and for them a proper place to play and safe conditions and supervision under which to play are imperatively demanded. The city already has a good number of playgrounds, and could without undue expense secure its proper quota. The next step is to see that the grounds we now possess are utilized to their full productive capacity.

Under the present law, the playground activities of the city may be carried on by any one of three agencies as the city decides through its City Council:—by the School Committee, by the Park Commission, or by an independent body created for the purpose. As a matter of fact, it makes no particular difference by which of these bodies the power is exercised *so long as it is really exercised with intelligence and thoughtful care*. The main point is to secure sensible supervision, and by supervision is meant a direction by persons interested in boys and girls and skilled in directing play activities. Up to the present time the only adequate

playground work has been done at private expense. The interests of a safe boyhood and girlhood demand that our playgrounds now be suitably equipped and so administered during the summer that these long weeks of what is now idleness or worse for many children may be converted into a time of actual constructive education, different it is true in kind, but in many instances exceeding in value that given the child in the school room. Some prompt action by the city in this direction is urgently needed. The report of Dr. J. Gardiner Smith, the Director of Physical Training follows:

Mr. Albert L. Barbour, Superintendent of Schools:

During the first half of the past year, there was made out and used such a course of provisional corrective gymnastics as would acquaint the teachers and pupils with the fundamentals of the work. They took great interest in the exercises and the general improvement in the capacity for assuming and maintaining a correct standing position, and for doing the exercises in good form was quite marked by the end of the spring term.

At the beginning of the fall term, a high standard of graded gymnastics was adapted for use in the grade schools, and we are at the present time, struggling to become acquainted with the new material. Within a few weeks the work in the first three grades will be started, and though it will necessarily be very simple, it will be very valuable in preparing the pupils for the standard of work that should come in the upper grades.

Last spring an athletic league was organized for the purpose of teaching loyalty to the school, capacity for team work and self-control to the boys, as well as for its physical and mental effects. A schedule of base ball games was made out and carried through to a successful termination. Games were scheduled for four afternoons a week during the months of April and May, and fifty-eight games in all were played. All the games were played at Merrymount park and the interest taken in these games can be best appreciated when it is known that every school played through the schedule, even

when all hope of winning was lost. Some of these boys walked two miles to play, with the same distance to return after the game.

The general interest aroused in the grade schools manifested itself in an attendance of from four to five hundred school children and teachers each afternoon, the final game bringing out an attendance of about twelve hundred. The entire expense of these games for balls, bats, gloves, masks, trophy and umpires was approximately a hundred sixty dollars, which was raised by the masters, and furnished for the most part by the children themselves.

The moral effect of the games upon the boys was very marked, as well as the improved relationship between master and pupil brought about by a common loyalty. The success of the games was due in a large part to the attendance, encouragement and general good influence of the masters.

It had been the intention of the department to introduce association foot ball into the grade schools during the fall term. There was some difficulty in making provision for the games, but finally through the encouragement and assistance of the Fore River and McGregor clubs, and especially through the efforts and almost daily help of Mr. Angus M. Cameron, formerly manager of the McGregors, the department took up the instruction of the seventh and eighth grade boys in this game, with the idea of giving every boy in these two grades an opportunity to learn the game. In this we were quite successful though we had started too late to follow up the preliminary practice with a schedule of games.

The Fore River club unanimously voted to deed a silver cup valued at one hundred dollars as a trophy for the encouragement of association foot ball in the schools, and the McGregors voted to give silver and bronze medals to all the individuals of the first and second teams. The pupils of the grade schools supplied their own foot balls at a considerable expense. It is not the object of the department to center all the athletic interest of a school in a single team, but just to arouse interest, and then furnish opportunity for general participation in athletic games and sports.

The matter of the medical examination of the grade school children as a means of co-operating with the parents for the elimination of such defects as may be found, as well as furnishing a guide in the corrective treatment of the individual child is now before the city government and is one of vital importance. In case provision is made for this work early enough an examination can be made and parents notified the coming spring. It would also be of great value if a nurse were engaged to assist in the work by visiting the homes.

As to the High School, there is every reason for feeling encouragement. Among the boys the general improvement in discipline has made itself felt in the gymnasium, resulting in a quicker response and more cheerful obedience. The time limit of seven minutes for changing clothes has been strictly adhered to and as each attendance in class impresses the fact upon the boy of being marked for attendance, for promptness in getting dressed and on the floor and for proper clothing, etc., improvement takes place along these lines.

I have added to the High School schedule sufficient time at the close of the school session to give special attention to those boys who prefer to do the work at that time rather than during their appointed period and hope that the time thus given will not only result in better work, but also in removing the necessity for its existence.

Miss Kirmayer, since September, has taken charge of the physical work done by the girls, and aside from her duties during the regular session, she has taken charge of athletics for the girls and is devoting some afternoon time to that work.

With the assistance of Miss Kirmayer, we expect at the beginning of the fall term of 1911 to make such physical and anthropometrical tests of all candidates for gymnastic and athletic work as will enable us to meet the individual needs of these pupils. It would be very desirable that more of the time and energies of Miss Kirmayer, who is especially fitted and thoroughly equipped for this work, be used in this department.

In addition to a large afternoon time schedule at the High School, for broadening the field of athletics and general gymnastics among the girls, an assistant could be used to great advantage in athletic organization, folk dances and other work among the girls of the grade schools.

One of the needs of the High School gymnasium is gymnastic apparatus. Pupils at this age are becoming sufficiently strong and their muscles and ligaments are sufficiently tough to require something more effective in moulding the form than the antagonistic muscles. I mention apparatus here especially for use in the corrective work and would recommend as a minimum a set of six or eight stall bars, a double boom and one or two Swedish boxes. One more thing, that perhaps should be mentioned, is the need of placing the regulation of the ventilation and the temperature of the gymnasium within the direct control of the gymnastic director. It is probable that no windows in the gymnasium have been opened since the building was constructed, as they are provided with no means of control whatever. A gymnasium above all places should be a model of hygienic environment with the air pure for breathing purposes, and temperature sufficiently cool to stimulate activity.

We have every reason to be well pleased with the growth of the activities in this department during the past year, and especially for a greater development of the work already undertaken.

Respectfully submitted,

J. GARDINER SMITH, M. D.

Evening Schools

The plan of evening school work was changed in several essential respects the past year with the hope of adapting it more completely to the needs of those who desire evening instruction. Two evening schools of an elementary grade were opened as in years past, at the Adams and the Willard buildings, but attendance at these schools was restricted to those desiring to learn to read and write the English language, and at the express request of the pupils English was the only subject taught. No provision was made at these schools for the instruction of English speaking people because this work has thus far proved disappointing and unsuccessful carried on in connection with the school for foreigners and the attendance has been scanty and irregular. To take the place of these classes however, several classes of an advanced nature were opened at the High School building in the various lines suggested in the last report and all proved successful, maintaining a satisfactory attendance and accomplishing a great deal of work.

The class in cooking was carried on with an attendance about the same as that of the previous year. The class in drawing, this year under the direction of Mr. Arthur Ray, was even more successful than in 1909 when its attendance recorded the highest point in its history. Pupils in this department worked along the several distinct lines of free-hand drawing, mechanical drawing, machine drawing and monument design with undiminished zeal and interest throughout the term. The work in monument design was new to the department this year and was in almost every respect an untried field, but it should develop into one of the strongest and most popular sides of the evening drawing work. The response to the announcement of an evening course in sewing, dresscutting and dressmaking was so great that it was necessary to engage two teachers to attend to the number who registered, and the regularity of attendance was excellent proof of the sustained interest in the instruction given. The enrolment in the commercial course was also double what had

been anticipated and the pupils were divided between an elementary and an advanced class, the latter having work of a strictly commercial nature, while the work of the former was on a par with the last years of the grammar school. The average attendance in each class was entirely satisfactory and the amount of work done was surprisingly large.

Another class of an experimental nature, that in civil service preparation, also had an unexpectedly large enrolment and maintained good attendance and work. This class was open only to those who had some definite examination in mind, which was specified in each instance at the opening of the course, so that work could be conducted with a concrete end in view. These classes at the High School were maintained as separate units with no definite organization as a single school, and were in the main a test of the recommendations made in the last report with reference to evening instruction. As every experiment made proved satisfactory, it opens the way to a broader extension in succeeding years.

There should be in the future an organized evening high school under a competent principal with the same courses and departments as those opened this year and probably in addition a class that would give instruction in some of the higher English branches, such as for instance, grammar, composition, literature, history and civil government. A few persons expressed a desire this year to do such work and very likely if such a course had been planned and offered, it would have appealed to a fairly large number of young people. Occasional requests are made for evening classes in stenography, but so little can be done in this study in our present short term that it hardly seems advisable at the present time to attempt the work.

The great growth each year of the evening courses in drawing has been most striking. It is probable that the needs of the community would be better met if this department were organized and developed next year as an independent industrial evening school under the direction of and practically supported by the state. Present lines of work would be continued and new lines would be added of an industrial na-

ture, fitted to appeal to the young people now engaged in the industries and needing better equipment in their particular lines.

The great difficulty and drawback to the success of all our evening courses is irregularity of attendance. In this respect, conditions might possibly be improved by attempting but three sessions a week in the advanced classes. It is a difficult and a trying matter for young people who have worked hard all day to do intensive mental labor in an evening school for four evenings in the week. It is a question whether it should be expected at all of persons below the age of maturity. The only thing that our school department can do is to study the problem carefully and from all sides, and to make such advances from year to year as we can in extending help to those in the community who feel the need for evening instruction and a vital interest in it. This problem of school extension work is one peculiar to the community, and it can only be solved by repeated trial and experiment.

This school report is intended to be a record of the year's progress in the educational forces of the community, and a statement of directions in which those forces should extend themselves in order to satisfy best the needs of the community. As the city's population increases and the demands of education change, new problems involving our schools are constantly coming to the front, both financial and professional. The success of our school system will be directly dependent upon the success with which these problems are solved. The generally progressive attitude of the city toward its educational needs is most encouraging to those who are endeavoring to place our young people in possession of the best possible equipment for their life work and will go far toward making the system an efficient one.

The spirit of loyalty and solidarity in the teaching corps, united with the spirit of co-operation in the community, makes the conditions most promising for educational growth.

Respectfully submitted,

ALBERT L. BARBOUR,

Superintendent.

Report of the Truant Officer

Mr. Albert L. Barbour, Superintendent of Schools:—

I herewith submit my thirteenth annual report as truant officer. The work of this office increases each year, due in part to our changing population and new child labor laws enacted by the legislature. In many cases it is a continuous battle to keep the children in school until the age limit of fourteen years, so eager are the parents to put their children to work.

The issuing of the labor certificates from this office has been a great help in finding the violators of the school attendance law.

It would be of great advantage if the large army of young fellows between sixteen and eighteen years of age, who are unemployed, could be interested to apply themselves as apprentices in one of our three great industries.

The street corner, billiard room and cheap variety shows are at present too largely frequented by the youth of our city. We have had three practical results of the splendid work done at the County Training School at Walpole, Mass., in the fine appearance of the boys dismissed from there this year.

The future of the boys of our city depends very largely upon the rigid enforcement of the School and Labor laws.

The table annexed will give in detail my work for the year.

Respectfully submitted,

CHARLES H. JOHNSON,

Truant Officer.

TRUANT STATISTICS

1910	Number of absences reported.	Number of parents or guardians notified.	Truancies determined by investigation.	Truants returned to school on day of truancy.	Children returned to school from street.	Tardiness investigated.	Number of manufactories or stores visited.	Number of children found employed contrary to law.	Number placed on probation.

To the Mayor and City Council:

Gentlemen:—The Directors of Woodward Institute herewith submit their annual report for the year 1910. So far as I know, there is nothing new that need be said with regard to the school.

The regular meetings of the Directors have been held as heretofore.

The resignation of Mr. Frederic W. Plummer, as principal of the institute, was a matter of regret to all connected with the school. His skill as teacher, his high character as a gentleman, his prolonged tenure of office were all of characteristic value to the school, and the Chairman thinks that he voices the feelings of all connected with him in regretting his loss. They feel, however, that they have been fortunate in securing the services of a skilled and mature principal in the person of Mr. Horace W. Rice.

The wisdom of the selection has already been proved. Mr. Rice has shown his fitness for the work from the beginning. There has been no break or interruption in the work or usefulness of the institution. The Chairman feels that if the honored founder could return, he would experience only the highest pleasure and gratification at the prosperity of the school, which he gave his money to found.

Respectfully submitted,

ELLERY C. BUTLER,

For the Board of Directors.

December 31, 1910.

Report of Superintendent

To the Board of Directors of Woodward Institute :

Gentlemen : In accordance with the rules and regulations of this board, I herewith submit my second annual report as Superintendent of Woodward Institute.

The event most worthy of note in the year's work of the school was the resignation of Mr. Frederic W. Plummer, who had been principal for the past nine years, to accept the principalship of the Chelsea High School, a position of greater responsibility and opportunity. Mr. Plummer's term of service at the head of Woodward Institute was an eminently successful one. He assumed the principalship at the time when the school had but a small attendance and before it had become a proved success, and by a wise and tactful administration he had steadily improved its efficiency, and its standing among secondary schools. From an attendance of 88, distributed among six classes, the numbers have increased more than 100 per cent, and the work and the energy of the school are now confined to the four classes usually found in public high schools. Mr. Plummer carries with him to his new field the hearty esteem of the faculty and pupils of Woodward Institute and the universal good will of the community.

From a large field of candidates to fill the vacancy in the principalship caused by Mr. Plummer's resignation, the position was offered to Mr. Horace W. Rice, for twelve years principal of the High school at Natick, Massachusetts and was accepted by him.

Mr. Rice had been associated with your Superintendent for nine years in charge of a large and well-organized high school and his appointment to the principalship of our Institute gives almost absolute assurance of its continued prosperity. He begins his work with the largest Freshman class and the largest enrolment in the history of the school and there is every reason to look forward to a steady development of the school both in scholarship and in fineness of spirit.

Household Science and Arts I					Household Science and Arts II				Harmony				Harmony			

With a view to increasing the efficiency of the school on the side of scholarship and to broaden the opportunities we may offer, the foregoing course of study was adopted during the past summer and is gradually being put into effect. In the appendix of this report, a complete and detailed statement is given showing exactly what work the school has to offer its pupils in various departments and this statement is well worth a careful consideration.

Speaking briefly, the changes most worthy of note are these:—Pupils will hereafter elect their work by courses, each with a definite and sustained plan, and not by subjects as heretofore. This change will not limit a pupil's freedom of choice in any other way than by preventing aimlessness and waste energy. There will in consequence of the change be fewer unwise choices, less conflict in courses and a closer supervision of electives.

The commercial course will be changed by adapting it better to the maturity of the different classes. Bookkeeping will no longer be a Freshman subject, but will begin in the Sophomore year, being preceded by a thorough course in commercial arithmetic, penmanship, spelling and business correspondence. Stenography will begin in the Junior instead of the Sophomore year as heretofore.

The new course of study makes the work in the Freshman year more definite by substituting algebra for inspectional geometry, and will also restore the balance in the science department by bringing physics into greater prominence.

The household science and arts course is new to the school but is a logical outgrowth of the present day demands in the education of girls. This course should give thorough training in many lines of work, essentially contributing to successful home making and will, it is to be hoped, become one of the strongest features of the school's work. Beside the work in food values and preparation which the school has offered for some time and which will now be extended, a thorough course has been outlined extending over four years, in sewing, dress cutting and making, and millinery. Miss Frances M. Whit-

comb, a graduate of Simmons College has been placed in charge of this department in connection with a similar course which she is conducting in the Quincy High School and is handling it with intelligence and success.

ATTENDANCE

Mention has been made of the growth of the school. The tables of attendance which follow will show how the pupils are distributed among classes and are of especial value in indicating the lines of work most generally selected.

Table I—Class and Total Enrolment by Years.

	SEVENTH CLASS	SIXTH CLASS	FIFTH CLASS	FOURTH CLASS	THIRD CLASS	JUNIOR CLASS	SENIOR CLASS	POST GRADUATES	TOTAL	TEACHERS

1913	55				1		5	6	43	
1914									66	
TOTAL	171	27		2	1	3	8	3	22	178

The percentage of attendance for the year 1909-10 was 95.9, a remarkably high one and considerably better than that of the previous year. Six of the twenty-seven pupils who graduated in June, 1910, returned for graduate work; two entered college; one entered normal school and five are attending business schools. Of the present school enrolment more than forty per cent. are fitting for higher institutions as indicated in the following table:

TABLE IV—Fitting for Higher Institutions.

POST GRADUATES	2	
1911	4	9
1912	5	10
1913	5	16
1914	6	25
Total	22	60

IMPROVEMENTS AND REPAIRS.

Few important repairs or changes on the building have been needed the past year. The arrangement of the locker rooms for the gymnasium has been altered and eighty new lockers have been installed without unduly crowding the space. A part of the unused corridor space has been partitioned off and is utilized for an office for the instructor in physical training. The chairs and desks have been removed from one of the small classrooms on the second floor to the science lecture room, allowing the former room to be used for a sewing room. A recent inspection of the building by the Massachusetts District Police has disclosed a number of minor changes, necessary to conform with the requirements of that body, and these are now either completed or in process. Hand rails are called for on all stairways; outside doors not in regular use are to have their

latches changed so that they may be readily opened; hand turn bolts are to be placed on all double doors and an additional exit is advised for the gymnasium. Repairs for the ensuing year, so far as now appear, are to be of a minor nature and ought to cause little expense.

The alumnae prize of five dollars' worth of books for the best essay written by a member of the Senior class (1910) was awarded to Miss Gertrude Shaw.

In all particulars the year's work has been a pleasant and successful one. While stress is laid, and needs to be laid more and more on developing scholarship, the social element has been no negligible factor in the girls' training. There have been many meetings, inter-class contests and other occasions of a social nature in which faculty and school have been brought together informally in a way which would hardly be possible in a public high school. These meetings have undoubtedly a very valuable educative effect entirely aside from their immediate purpose and the pleasure of the moment. The atmosphere of the school is thoroughly democratic, and the spirit of community of interest is genuinely fine, and under such conditions Woodward Institute cannot fail to be powerful and efficient social factor in the community.

Respectfully submitted,

ALBERT L. BARBOUR,

Superintendent.

EXPLANATION OF THE COURSE OF STUDY

All pupils are expected to take "required" studies unless excused by the principal.

In the column marked "P" is indicated the number of periods of recitations per week.

In the column marked "C" is indicated the number of credits allowed for satisfactory work in each subject.

A total of eighty credits entitles a pupil to a diploma. One additional credit will be allowed each year for excellence in conduct and effort.

If a pupil wishes to prepare for a scientific or technical school, a course of study will be arranged to meet her requirements; also, a special course will be arranged for any pupil who may wish to spend five years in preparing for college. *A five years' course for college preparation is strongly advised.*

Science I is an Introduction to Science; Science II is Biology; Science III is Chemistry; Science IV is Physics; History I is Ancient History; History II is English and European History; History III is American History and Civil Government; Mathematics I is Elementary Algebra; Mathematics II is Algebra completed; Mathematics III is Plane Geometry; Mathematics IV is Review of Mathematics or Solid Geometry.

DEPARTMENT OF ENGLISH

LITERATURE

The first two years of the course in literature are spent in reading carefully, but without attempting analysis and criticism, as much of the world's best literature as the time will allow. The books are selected because they are adapted to the minds of the readers and are worth reading. They include not only English classics but good translations from the literature of various nations and cover many subjects. There are three distinct aims in the course: (1) to teach the students to read intelligently and enjoyably; (2) to develop in them a taste for good literature; (3) to lay a broad foundation for the subsequent study and appreciation of the English classics selected for the third and fourth years. These are taken up in the order of narration, description, exposition, and argument. An outline history of English literature, supplemented by a study of English poets, completes the four years' course.

COMPOSITION

The work in composition is correlated with the course in literature—narration, description, exposition, and argument, each taken in turn. The course is designed to aid pupils in expressing themselves clearly and logically in oral as well as in written form. Weekly themes are required during the first three years. These formal compositions are supplemented by frequent class-room exercises in dictation, letter-writing and outlining. During the fourth year, at least three compositions are required each week.

The pupils are urged to write from their own experience, to write often, and to acquire the habit of using simple, correct, idiomatic English.

DEPARTMENT OF LATIN

- I. Latin Lessons.
Translation of prose selections.
- II. Caesar,—Commentaries on Gallie War, books I-IV inclusive.
Sight reading.
Prose composition.
Grammar.
- III. Cicero,—Orations against Catiline, The Manilian Law, and Archias.
Sight reading.
Prose composition.
- IV. Virgil,—Æneid, books I-VI inclusive.
Sight reading.
Prosody.

DEPARTMENT OF MODERN LANGUAGES

FRENCH

- I. Pronunciation.
Grammar: Conjugation of regular verbs, and of a few irregular verbs.
Simpler uses of tenses and moods.
Syntax.
- Memorizing: Prose selections.
- Reading: Lectures Faciles, Contes de Fees' or Le Tache du Petit Pierre.
- II. Dictation.
Conversation.
Paraphrasing.
Composition.
Grammar: Continuation.
Conjugation of irregular verbs.
Uses of tenses and moods.

Reading: de Maistre's Prisonniers du Caucase.
 Sandeau's Mlle. de la Seigliere.
 Daudet's La Belle-Nivernaise.
 Roger's French Sight Reading.
 Le Gendre de M. Poirier.

III. Dictation.

Conversation.

Constant practice in translating into French.

Memorizing: Prose and poetry.

Grammar: Review and continuation of difficult points,
 especially the subjunctive.

Study of idioms.

Reading: Moliere's L'Avare.
 Corneille's Le Cid.
 Daudet's La Belle-Nivernaise.
 Corneille's Polyeucte (alternate years).
 Balzac's Eugenie Grandet.
 Fontaine's Fables.

IV. Prose Composition.

Thorough review of grammar.

About twenty-five lessons in Francais.

Advanced French Prose, with detailed study and practice
 in idioms.

GERMAN

I. Pronunciation.

Grammar: Declension.

Conjugation of weak verbs and of the
 more usual strong verbs.

Simpler uses of tenses and moods.

Prepositions.

Syntax.

Memorizing: Vocabulary for oral and written work.
 Prose and poetry selections.

Composition: Translation into German.

Transposition.

Reproduction.

Dictation.

Easy conversation.

Reading and translation of Fairy Tales.

- II Grammar: Conjugation of strong and irregular verbs and modal auxiliaries.
Order of words.

Translation: Schiller's *Der Neffe als Onkel*.
Arnold's *Fritz auf Ferien*.
Gerstacker's *Germelshausen*.
Hillerne's *Hoher als die Kirche*.
Storm's *Immensee*.
Sight reading from easy texts.

- III. Prose Composition.

Grammar: Continuation of difficult points.

Conversation.

Dictation.

Memorizing of German Folk Songs.

Translation: Gerstacker's *Irrfahrten*.

Lessings' *Minna von Barnhelm*.

Schiller's *Ballads*, *Die Jungfrau von Orleans*.

DEPARTMENT OF SCIENCE

- I. Introduction to science,—training in careful observation and scientific methods as a preparation for subsequent work.

The evolution of the solar system and the formation of the earth.

The elementary facts of astronomy and geology.

The examination of a few of the common minerals and rocks.

The systematic observation and record of some common phenomena.

Simple experiments to ascertain facts or to test given propositions.

The classification of facts under divisions of science.

II. Zoology, first half year.

The time is about evenly divided between laboratory and recitation work.

Elementary work in morphology, physiology and some ecology.

Botany, second half year.

There is considerable field work for the purpose of identifying plants, studying their habitat and procuring specimens for a small herbarium.

III. Chemistry or Physics.

A class in one subject only will be formed for those electing science in the third year.

IV. Physics or Chemistry.

The subject not taken in the third year is offered in the fourth.

DEPARTMENT OF MATHEMATICS

I. Elementary algebra.

II. Elementary algebra completed.

III. Plane geometry,—demonstrations and original work.

IV. Solid geometry or advanced work in algebra.

DEPARTMENT OF BUSINESS

First Year

Commercial Arithmetic. A review of fundamental processes. Short methods and drill in business problems. Business correspondence, spelling and penmanship.

Second Year

Bookkeeping. Double and single-entry bookkeeping. Penmanship.

Third Year

- Bookkeeping. Business practice.
 Stenography. Principles of stenography.
 Typewriting. Use of the typewriter. Drill exercises.

Fourth Year

- Stenography. Practice in reading and writing shorthand.
 Typewriting. Transcribing shorthand notes. Copying. Duplicating.
 Commercial Geography. A study of commercial and industrial conditions, products and countries. Pupils who elect the Household Science and Arts Course are required to take commercial geography the third year of their course.

DEPARTMENT OF PHYSICAL TRAINING

Physical Training I.

- Individual prescription work.
 Class work. Military marching; free exercises, bar and ring work, folk dances, Virginia Reel.
 Games. Basketball. Tennis.

Physiology I.

- Relation of health to posture; dress and cleanliness.
 Study of skeleton and of muscular system.
 Emergencies.

Physical Training II.

- Individual prescription work.
 Class work. Marching, fancy steps, folk dances; free work, dumb-bells, club and wand exercises.
 Games. Basketball. Tennis.

Physiology II.

- Anatomy, physiology and hygiene of the digestive and circulatory systems.

Physical Training III.

Individual prescription work.

Class work. Marching; free exercises, chest weights, horizontal bar, ring and club exercises. Folk dancing, fancy steps.

Games. Basketball. Tennis.

Physiology III.

Anatomy, physiology and hygiene of circulatory and nervous systems, skin and kidneys.

Physical Training IV.

Individual prescription work.

Class Work. Marching, jig and fancy steps; free work, bounding balls, dumb-bells, chest weights, clubs, wands and ring exercises. Folk dancing.

Games. Basketball. Tennis.

Physiology IV.

Physiology of nervous, respiratory, circulatory and digestive systems, reviewed.

Special senses, eye, ear, voice.

Advanced emergencies with demonstrations and talks on first aid to the injured.

Papers on diet, exercise, sleep, bathing, clothing.

DEPARTMENT OF HISTORY.

1. Ancient History. (a) A preliminary consideration of the origin and races of mankind,—their primitive condition, migrations, and progress toward civilization.
- (b) A brief study of the extinct civilization of the East.
- (c) Greek history to the death of Alexander.
- (d) Roman history from the founding of the city to 800 A. D.

- II. English history to the accession of George V.
- III. American history, special attention being given to the forces which have shaped the government of the United States and developed its present institutions. Civil government of the United States.

DEPARTMENT OF MUSIC

The aim of the department of music is to cultivate a taste for good music and to prepare the girls for intelligent and appreciative work in the further pursuit of the art in its various branches.

The vocal and choral study includes vocalization, solfeggio, sight reading, dynamics, breath control, intonation, enunciation, unison and part singing.

The elementary theoretical work (required) aims to give the pupil a thorough foundation in the elements of music and includes rhythm, meter intervals, the derivation and construction of our present day tonalities major, all minor forms and chromatic scale in all keys, triads, chords of the dominant and diminished sevenths and cadences, leading to the study of

Harmony—elective but strongly advised for all pupils in vocal or instrumental study.

Individual class work, one period weekly.

Vocal and choral work (entire school required) one period weekly.

DEPARTMENT OF ART

The study of art must necessarily be considered as a whole rather than the work of different classes; therefore, the course of drawing is arranged to meet the needs of the individual student and is varied to suit any requirements.

Pupils are not only fitted for continuing their studies in advanced schools but also to appreciate the best in art.

The general plan is as follows :

Free-hand drawing of objects in pencil, and pen and ink, and principles of perspective.

Study of form, light and shade.

Study of design, applied decoration.

Study of color in water colors and in oil.

Modeling and casting.

Mechanical drawing.

DEPARTMENT OF HOUSEHOLD SCIENCE AND ARTS

- I. A simple outline of the location, surroundings, and proper conditions of a home. Special attention is given to the dining room and kitchen, together with the care and use of their furnishings.
- II. Study of air, fire, water and some of the most important elements in relation to life, heat and cooking.
- III. Study of food, its functions; growth, waste and repair of the human body.
- IV. Food principles; water, mineral matter, carbohydrates, proteids, fats and oils. Under these subjects, foods are prepared and cooked by the pupils. The composition, food value, growth, market value and best method of serving are discussed.

The second year course will be a continuation and enlargement of the first year course, with lessons on invalid cooking and serving, table service and table etiquette, the preparation of inexpensive but nourishing meals and the serving of the same, instruction in drawing plans of a kitchen and dining room, and in furnishing them conveniently, economically and tastefully.

SEWING

First Year

- I. Brief review of stitches, and making of samples illustrating uses.
- II. Ornamental stitches; construction of seams; methods of finishing seams.
- III. The use of the sewing machine.
- IV. Study of cotton, growth, manufacture and cost; the terms warp, woof, bias, lengthwise and crosswise.
- V. Uses of paper patterns.
- V. Cutting and making sewing bag, sewing apron, plain undergarments and shirt waists.

Second Year

- I. Continuation of the first year's programme with more attention given to design.
- II. The use of laces and embroideries.
- III. Study of linen in relation to the household.

Third Year

Draughting; cutting and making garments from patterns draughted.

Fourth Year

A rapid general review with the addition of millinery and raffia work.

Founder's Day

Friday evening, March 11, 1910

Musical Programme by pupils of the School assisted by

MISS TERESA KEATING '06

MISS MAUD ELIZABETH READ '07

and

MISS RUTH PENNIMAN '08

Under the direction of

MR. JOHN D. BUCKINGHAM

Programme

1. Chorus—

- | | | |
|---------------------------|-----------|---------------|
| a. Bolero | | <i>Verdi</i> |
| b. Maiden and Nightingale | | <i>Renard</i> |

2. Pianoforte—

- | | | |
|-------------------------------|-----------|---------------|
| Fantasie in C Minor | | <i>Mozart</i> |
| MISS AMY ELIZABETH FALLON '12 | | |

3. Violin—

- | | | |
|-----------------------|-----------|------------------|
| a. Salut d'Amour | | <i>Elgar</i> |
| b. Mazurka | | <i>Mjilinski</i> |
| MISS RUTH KEATING '10 | | |

4. Chorus—

- | | | |
|-------------------------------|-----------|------------------|
| The Little Bird | | <i>Soderberg</i> |
| SOLO BY MISS ESTHER DASHA '12 | | |

5. **Rondo** for Piano and Orchestra—op. 56 . . . *Hummel*

MISS RUTH PENNIMAN
Orchestral part supplied on second piano

6. **Soprano Solo—**

- a. **Sombre Woods** *Lully*
b. **Irish Folk Song** *Footé*

MISS TERESA KEATING
Violin Obligato by Miss Ruth Keating

7. **Reading—**

- a. **The Courtship of Miles Standish** . . . *Longfellow*
b. **An Old Sweetheart of Mine** . . . *Riley*

MISS MAUD ELIZABETH READ

8. **Violoncello Solo—**

- Alla Pollacca** *Goltermann*

MISS MARION MOORHOUSE '10

9. **Chorus—**

- Rockin' Time** *Knox*

Graduating Exercises

FRIDAY EVENING, JUNE 15, 1910

— PROGRAMME —

Music by the school under the direction of Mr. John D. Buckingham

TRIO: VIOLIN, 'CELLO AND PIANO

Adagio, Allegro con spirito

C. Bohm

Miss Ruth Keating, Miss Dorothy Alexander, Miss Nellie Drummond

CHORUS; O that we two were maying

Gounod

VIOLIN SOLO: 7th Air

de Bériot

Miss Ruth Keating

CHORUS: Bridal Chorus

Cowen

ADDRESS: Individuality

Rabbi Charles Fleischer

CONFERRING DIPLOMAS

Rev. Ellery C. Butler

CLASS OF 1910

Gertrude Fay Baker
Marjorie Seelye Gould

Dorothy Quincy Alexander
Dorothy Grace Bean
Clara Beatrice Brown
Harriet Frances Burns
Helen Margaret Callahan
Mary Ethelreda Cook
Synthia Elizabeth Curtis
Mabel Ellen Dorlay
Nellie May Drummond
Teresa Edwards
Marie Winifred Goodhue

Ruth Anna Keating
Catherine Helen Laing
Gertrude Ursula Larkin
Lillian Engeborg Linberg
Marion Lawrence Moorhouse
Mary Caldwell Murray
Katherine Clare O'Neil
Corine Eleanor Samuelson
Gertrude Annie Shaw
Bertha May Smith
Bertha Marie Vendret
Emma Eaton Walker
Alice Louise Waterhouse
Ruth Augusta Winslow

CLASS ODE

Written by Marie Winifred Goodhue

As we bid farewell to Woodward
Joy and sorrow strangely blend,
Now through other scenes and pathways
Each alone her way shall wend.

Many pleasant ties have bound us,
Bright and gladsome is the past,
Mem'ries sweet will linger round us
As our thoughts we backward cast.

Vast and untried is the future
Open are its portals thrown,
Shall we find success or failure?
Time will answer—Time alone.

Fall we may—oft have the bravest,
We must rise and start anew,
Thus at last may we, dear Woodward,
Pay our debt of love to you.

CALENDAR FOR 1911

Winter term: Monday, January 2—Friday, April 7.

Founder's Day: Friday, March 10.

Spring term: Monday, April 17—Friday, June 16.

Graduation: Wednesday, June 14.

Fall term: Tuesday, September 5—Wednesday, December 20.

New Year: Tuesday, January 2, 1912.

Holidays: February 22, April 19, May 30, June 17, and the remainder of the week from Wednesday noon next preceding Thanksgiving.
